Student Solutions Manual for Intermediate Algebra With P.O.W.E.R. Learning Lawrence Perez, Instructor, Sherri Messersmith, 2013-10-03 After having written five developmental algebra textbooks I decided to team up with Larry Perez from Saddleback College in California to write a paperback series beginning with Basic College Math or arithmetic We know first hand that teaching developmental mathematics is about so much more than the math Today many of our students are also in developmental reading and or writing courses so they don t read well Many students are poor note takers do not know how to read use a textbook have poor study skills and have never learned time management skills Instructors know that a major reason for high failure rates in developmental math courses is due to the fact that many of our students do not know how to be college students They don t want to fail they just don t know how to succeed Larry and I have adapted what we do in the classroom to try to address the non math needs of our students But we wondered how can we do this in a textbook Enter P O W E R P O W E R is a five step process to promote learning and critical thinking Each step in the process Prepare Organize Work Evaluate and Rethink provides students with a proven framework that will help them achieve academic success P O W E R maximizes the success of students by using a research based best practices approach It is a scientifically based framework promoting student success with each step in the process based on empirical research findings related to students academic performance in a college environment
