2004 ,2004 This report emphasises the development of human capital to respond to future labour market needs in APEC and contributes to collective understanding of the synergies between human capital and innovation in fuelling growth performance In the paper International Mobility of Highly Qualified People in APEC the study argues that highly qualified people HQP are indispensable to an innovative economy A more innovative economy requires that the labour force include the right number and types of HQPs However for some segments of HQPs the job market is now international with the industrialized economies in APEC competing to attract individuals with the most in demand skills and experience This means that if APEC economies are to adjust to new skill requirements in order to support a more innovative economy they must formulate policies to retain domestic talent and attract HQPs from abroad On the other hand the mobility of HQPs is a necessary condition for knowledge dissemination and absorption in the new global economy The second paper The Development of Industrial Clusters Towards a Knowledge based Economy drawing on the empirical evidence from the Hsinchu Science based Industrial Park HSIP finds that human resources are indispensable to the build up of innovation capability As an economy develops it may even attract skilled labor from overseas However human resources that are repatriated or attracted from abroad are always insufficient to support the operations of an industrial cluster and they have to be complemented by indigenous skills
