figure farmers allocate all of their labor in the agricultural sector A technological improvement by 20% on teff enables households to fully engage in agricultural activities and secure the highest utility compared to other shocks while other crops are not responsive to technological change This implies that stakeholders should focus to improve the method of production of teff in the village In addition the government should get involved in such a way that factor prices shouldn't be increased beyond a certain point Ethiopia has experienced three main political regime changes in the last five decades along with an unremitting political instability and war In the imperial regime a mixture of feudalism and capitalism was the main framework of the economy The government also attempted to implement successive five year planning that heavily engaged in industrialization However they failed to achieve what is expected due to the fact that agriculture received less attention Amidst this performance the socialist government seized power and nationalized all the emerging private industries The government firmly controlled all economic activities and marginalized private investors from main activities The Constitution of the United States, the Ordinance of 1787, the Organic Act, Act authorizing a state government, the State Constitution, the Act of Admission into the Union, and sections 1 to 4821 of the general statutes Minnesota,1894
