The Human Search:

The Human Search, 1979 **Search Algorithms and Applications** Nashat Mansour, 2011-04-26 Search algorithms aim to find solutions or objects with specified properties and constraints in a large solution search space or among a collection of objects A solution can be a set of value assignments to variables that will satisfy the constraints or a sub structure of a given discrete structure In addition there are search algorithms mostly probabilistic that are designed for the prospective quantum computer This book demonstrates the wide applicability of search algorithms for the purpose of developing useful and practical solutions to problems that arise in a variety of problem domains Although it is targeted to a wide group of readers researchers graduate students and practitioners it does not offer an exhaustive coverage of search algorithms and applications The chapters are organized into three parts Population based and quantum search algorithms Search algorithms for image and video processing and Search algorithms for engineering applications *Search and Rescue Robotics* Multiple Authors, 2017-08-23 In the event of large crises earthquakes typhoons floods a primordial task of the fire and rescue services is the search for human survivors on the incident site This is a complex and dangerous task which too often leads to loss of lives among the human crisis managers themselves This book explains how unmanned search can be added to the toolkit of the search and rescue workers offering a valuable tool to save human lives and to speed up the search and rescue process The introduction of robotic tools in the world of search and rescue is not straightforward due to the fact that the search and rescue context is extremely technology unfriendly meaning that very robust solutions which can be deployed extremely quickly are required Multiple research projects across the world are tackling this problem and in this book a special focus is placed on showcasing the results of the European Union ICARUS project on this subject The ICARUS project proposes to equip first responders with a comprehensive and integrated set of unmanned search and rescue tools to increase the situational awareness of human crisis managers so that more work can be done in a shorter amount of time The ICARUS tools consist of assistive unmanned air ground and sea vehicles equipped with victim detection sensors The unmanned vehicles collaborate as a coordinated team communicating via ad hoc cognitive radio networking To ensure optimal human robot collaboration these tools are seamlessly integrated into the command and control equipment of the human crisis managers and a set of training and support tools is provided to them in order to learn to use the ICARUS system The research leading to these results has received funding from the European Community's Seventh Framework Programme FP7 2007 2013 under grant agreement number 285417 The publishing of this book was funded by the EC FP7 Post Grant Open Access Pilot programme **Theological and Philosophical Explorations of the Call of Literature** David Lonsdale, Emilia Di Rocco, Brett H. Speakman, 2025-05-23 This book explores the call of literature for both writers and their audiences and reflects on how literary works have informed and drawn from and continue to inform and draw from theology philosophy and sacred scripture Key questions addressed include the following How do creative writers and critics conceive

this call What does it mean to speak of a vocation to write and what have theologians and philosophers got to say on the matter Is the spirit of literature always or necessarily an angel of light Or is the call of literature a siren song The essays by an international and interdisciplinary range of contributors discuss the work and testimony of writers from William Blake Gerard Manley Hopkins and R S Thomas to James Joyce Virginia Woolf and Michel Houellebecq Also examined are the ideas and influence of figures such as John Henry Newman who wrote that the importance of literature stems from our very nature and God given powers as human beings especially language This latest volume from The Power of the Word Project will be of interest to scholars from theology philosophy and literature

The Complete Topical Guide to the Bible Martin Hugh Manser, Alister McGrath, J. Packer, Donald Wiseman, 2017-05-02 The Complete Topical Guide to the Bible provides Scripture references definitions and cross references for the study of the Bible by topic The topical approach differs significantly from the lexical approach of a concordance and a topical guide is an essential supplement to a concordance While a concordance is limited to the connection of biblical passages in which the same word appears the topical approach identifies and connects all of the underlying concepts related to a topic A concordance would not yield John 3 16 for a study of grace because the word grace does not appear in the verse but The Complete Topical Guide to the Bible includes John 3 16 for grace because it s an essential verse on the topic The topics in this resource include biblical doctrinal and historical subjects and they are organized into nine major categories God Jesus Christ the Holy Spirit creation humanity sin and salvation God s people the life of the believer and the last things In addition to the great themes of the biblical

message practical issues of Christian living are also included
