Time Future:

Television Aesthetics Nikos Metallinos, 2013-11-05 USE FIRST TWO PARAGRAPHS ONLY FOR GENERAL CATALOGS

This volume offers a response to three ongoing needs to develop the main composition principles pertinent to the visual communication medium of television to establish the field of television aesthetics as an extension of the broader field of visual literacy and to promote television aesthetics to both students and consumers of television. Based on effective empirical research from three axes: perception, cognition, and composition, the aesthetic principles of television images presented are drawn from converging research in academic disciplines such as psychology, perceptual cognitive and experimental neurophysiology, and the fine arts: painting, photography, film, theater, music, and more. Although the aesthetics of the fine arts were traditionally built on contextual theories that relied heavily on subjective evaluation, on critical analyses, and on descriptive research methods, the aesthetics of today's visual communication media consider equally valuable empirical methodologies found in all sciences. Investigations in these different academic disciplines have provided the constructs and strengthened the foundations of the theory of television aesthetics offered in this book. Special features include a great variety of pictures supporting the topics discussed, a thorough up-to-date and specifically related bibliography for each of the major parts of the book, computer drawings illustrating the concepts examined in the text, scientific data tables and charts documenting the research findings, cited simplified explanations of the processes of visual, auditory, and motion perceptions of images, enhanced by specific diagrams, detailed analyses of the threefold process of stimulation, perception, and recognition of televised images, and workable, easy-to-understand and use rules of picture composition, visual image evaluations, and television program appreciation.

Other Times, Other Realities

Arnold H. Modell,1990 Nearly a century has passed since Freud s theories unleashed a revolution in our understanding of the human psyche Yet as Arnold Modell firmly points out we still do not possess a theory that explains how psychoanalysis works Other Times Other Realities provides brilliant insight into this perplexing problem and lays the foundation for a comprehensive theory of psychoanalytic treatment Modell s careful consideration of Freudian theory the interpretations of contemporary ego psychology and the contribution of object theory discloses the changing significance of the fundamental elements of the therapeutic process In Other Times Other Realities readers will discover an illuminating synthesis of concepts underlying the various interpretations of the psychoanalytic process *An introduction to English grammar, on universal principles* Hugh DOHERTY (Miscellaneous Writer.),1841 [A Study of Time in Indian Philosophy](#) Anindita Niyogi Balslev,2009-01-01 Since its first publication *A Study of Time in Indian Philosophy* has been acclaimed as having successfully shown the simple falsity of such clich_s that the Indian view of time is cyclic or that it is exclusively illusory Given the variety of views discussed in this work it is evident that the theme of time is intimately related to such basic concepts as being and becoming change and causality creation and annihilation It has been therefore observed that this book makes an excellent introduction to the heart of Indian thought Based on Sanskrit source material this book is a unique attempt to presenting a comprehensive review of the widely divergent views about time in Indian thought Clearly written it succeeds in setting out the issues of discussion pointedly and cogently Since the concept of time intervenes with such major concepts as that of causality being and non being etc this book also serves as a general introduction to the classic heart of Indian Philosophy The author has demonstrated a rare ability to translate technical doctrines from one tradition of thought into the language of another and thus has made it possible for all those who are concerned with the question of time but do not have access in the Indian conceptual world to appreciate the contributions of Indian thought with regard to this complex question Noteworthy is the fact that this book is the first attempt which successfully exposes the simple falsity of such cliches as that the Indian view of time is cyclic as opposed to the Judaeo Christian understanding of linear time *A Study of Time in Indian Philosophy* therefore renders a valuable service to all those who are concerned with cross cultural and inter religious exchange
