**Time Domain Wave-splittings and Inverse Problems** Sailing He, Staffan Ström, Vaughan H. Weston, 1998 MIF awaited Use short description and contents list meanwhile Contents list is important to potential readers **Invariant Imbedding and Inverse Problems** James P. Coronas, 1992-01-01 This volume on invariant imbedding and inverse problems is based on a conference held in Albuquerque New Mexico in April 1990 **Modeling and Analysis of Transient Processes in Open Resonant Structures** Yuriy K. Sirenko, Staffan Ström, Nataliya P. Yashina, 2007-04-03 This book describes a systematic approach to scattering of transient fields which can be introduced in undergraduate or graduate courses The initial boundary value problems considered describe the transient electromagnetic fields formed by open periodic compact and waveguide resonators The methods developed and the mathematical and physical results obtained provide a basis on which a modern theory for the scattering of resonant non harmonic waves can be developed Inverse Problems in Scattering and Imaging Society of Photo-optical Instrumentation Engineers, 1992 **Review of Progress in Quantitative Nondestructive Evaluation** Donald O. Thompson, Dale E. Chimenti, 2013-11-11 These Proceedings consisting of Parts A and B contain the edited versions of most of the papers presented at the annual Review of Progress in Quantitative Nondestructive Evaluation held at Bowdoin College Brunswick Maine on July 28 to August 2 1996 The Review was organized by the Center for NDE at Iowa State University in cooperation with the American Society of Nondestructive Testing the Ames Laboratory of the USDOE the Federal Aviation Administration the National Institute of Standards and Technology and the National Science Foundation Industry University Cooperative Research Centers program This year's Review of Progress in QNDE was attended by approximately 400 participants from the U S and many foreign countries who presented over 350 papers As usual the meeting was divided into 36 sessions with as many as four sessions running concurrently The Review covered all phases of NDE research and development from fundamental investigations to engineering applications or inspection systems and it included many important methods of inspection techniques from acoustics to x rays In the last eight to ten years the Review has stabilized at about its current size which most participants seem to agree is large enough to permit a full scale overview of the latest developments but still small enough to retain the collegial atmosphere which has marked the Review since its inception **Inverse Problems on Nonuniform Transmission Lines** Jonas Lundstedt, 1995 **Elastic Wave Propagation** F. McCarthy, M. Hayes, 2018-06-20 This volume contains a timely collection of research papers on the latest developments in the ever increasing use of elastic waves in a variety of contexts There are reports on wave propagation in various types of media in both isotropic and anisotropic bodies in homogeneous and inhomogeneous media in media with cracks or inclusions in random media and in layered composites The bulk of the papers are concerned with propagation in elastic media but also included are viscoelastic thermoelastic and magneto electroelastic wave propagation as well as waves in porous and piezo electric bodies Consideration is given to propagation in bodies as diverse as

stretched elastic strings to surfaces such as thin walled cylinders and thin films under stress Applications considered include the determination of the depth of cracks analysis of ground motions generated by a finite fault in seismology surface wave spreading on piezo electric solids and dynamical stress intensity factors Most of the papers are theoretical in nature and many are complemented by numerical studies Also included are a general survey on experimental techniques and reports on experimental work The volume will be of interest to those who do theoretical studies of elastic wave propagation and to those who apply elastic waves whether in seismology non destructive testing the fabrication of devices or underwater acoustics etc
