## **The Heart Test:**

**Rs. 200/\$20 ECG Test, 1 of 3 Simple Noninvasive Heart Tests, Can Add 15-30 Years to Our Life - English** Dr. S. Om Goel (MD / DM USA),2020-10-27 Why it is very important to read this book Answer is it is very important to read this book because Heart health is very important to us Heart attack or sudden death from the heart attack has become so rampant in India It is affecting more and more youngish male population Women have some protection from the heart attack until they are in their reproductive age but they still have some amount of risk Our recommendation is to start screening all the males at age 30 This will give us a baseline And continue every five years with three most important simple noninvasive not at all costly Tests If all these three tests are normal then I can give you in writing that you will not have heart attack for the next five years Statistically it is not possible Why these three tests are important These tests are important because all these three different tests give us complementary information As far as ECG EKG is concerned it gives us all the information about the electrical conductivity of the heart and our ECG is like our fingerprint I can guarantee that if you take your ECG every year and put one above the other they will be exactly the same ECG helps us to understand the function of the two electrical nodes in our heart which control the rhythm and the rate of the rhythmic contraction and relaxation of the heart We all know that in a heart attack we immediately do ECG and if you are having a heart attack you can see changes in the ECG we can pretty much figure it out But why to wait for that point when we are really having heart attack because we may not have more than 5 to 10 minutes to recover from the heart attack and if our brain does not get blood and oxygen for several minutes our brain is never going to come back even though if our heart comes back and we may not be alive anymore Since we will never have 5 minutes so our hope is that by doing three simple tests we can really statistically almost 100% anticipate what is going to happen over next five years and if we see any negative information we can always fix it in time seeking the help from the best heart doctors but we need information and time [The Heart Truth: Everything you Wanted to Know About Prevention, Treatment and Reversal of Heart Disease](#) Dr Aashish Contractor,2024-07 AN EXHAUSTIVE GUIDEBOOK ON HOW TO TAKE CARE OF YOUR HEART WRITTEN IN SIMPLE AND EASY TO UNDERSTAND LANGUAGE In The Heart Truth Dr Aashish Contractor the leading authority in preventive cardiology and rehabilitation describes how you can treat rehabilitate and prevent heart ailments From problems of the heart to tests that one can do the risk factors surgery recovery reversal of heart disease medication nutrition and exercise this is an exhaustive guide specifically for the layperson Written in a simple lucid manner with real life examples this book will empower you with the knowledge required to take care of your heart As Dr Contractor who has over eighteen years of experience and has helped over ten thousand patients says taking care of the heart is not rocket science rather it s all about simple steps done consistently Whether you have suffered from a heart condition are at high risk want to prevent heart disease or just want to keep your heart fit and healthy this book is a must read **The Heart Test** Edward B.
