B.V.,Development Research Center DRC,2020-05-29 This open access book is an encyclopaedic analysis of the current and future energy system of the world's most populous country and second biggest economy. What happens in China impacts the planet. In the past 40 years, China has achieved one of the most remarkable economic growth rates in history. Its GDP has risen by a factor of 65, enabling 850,000 people to rise out of poverty. Growth on this scale comes with consequences. China is the world's biggest consumer of primary energy and the world's biggest emitter of CO2 emissions. Creating a prosperous and harmonious society that delivers economic growth and a high quality of life for all will require radical change in the energy sector and a rewiring of the economy more widely. In *China's Energy Revolution in the Context of the Global Energy Transition*, a team of researchers from the Development Research Center of the State Council of China and Shell International examine how China can revolutionise its supply and use of energy. They examine the entire energy system: coal, oil, gas, nuclear, renewables, and new energies in production, conversion, distribution, and consumption. They compare China with case studies and lessons learned in other countries. They ask which technology, policy, and market mechanisms are required to support the change, and they explore how international cooperation can smooth the way to an energy revolution in China and across the world. And they create and compare scenarios on possible pathways to a future energy system that is low carbon, affordable, secure, and reliable.

Plotinus: On the nature of the soul, being the fourth Ennead Plotinus,1924 Story as Torah Gordon

Wenham,2004-05-01 It can sometimes be difficult for the modern reader to know whether the author of an Old Testament book is commending or condemning certain acts. Professor Wenham turns to modern literary theory and ethical analysis to show how two quite different books of the Old Testament, Genesis and Judges, offer ethical models of behaviour. He focuses on the attitudes of the authors rather than the morals of the characters in the stories and argues that these models are actually closer to New Testament ideals than has previously been recognised.
