**Tigers In Red Weather** Ruth Padel,2009-05-26 Poet writer and descendant of Charles Darwin Ruth Padel set out to visit a tropical jungle and wildlife sanctuary in India and her visit turned into a remarkable two year journey through eleven countries in search of that most elusive and most beautiful animal the tiger Armed with her grandmother s opera glasses and Tunisian running shoes she set off across Asia to ask the question can the tiger be saved from extinction in the wild Tigers are an umbrella species they need everything in the forest to work in tandem they eat deer the deer need vegetation the vegetation has to be pollinated by birds mammals rodents and butterflies If you save the tiger you save everything else Today the 5 000 tigers that still survive in the wild live only in Asia and are scattered throughout 14 countries

Padel says that while tigers will never become extinct they are too popular for that they may disappear from the wild There are as many tigers in cages in the US as there are surviving tigers in the wild As she travels she meets the defenders of the wild the heroic scientists forest guards and conservationists at the frontline fighting to save tigers and their forests from destruction in the places where poverty threatens to wipe out all wildlife She also examines her fascination both as a poet and as the great great granddaughter of Charles Darwin with nature wildness and survival and in the end becomes a knowledgeable advocate for the tiger The result is a beautiful blend of natural history travel literature and memoir and a searing intimate portrait of an animal we have loved and feared almost to extinction Tigers in Red Weather Ruth Padel,2005 After a terrible year the end of a five year affair and the death of her father Ruth Padel wants out from normal life and happens across an advert for a trip to India She visits a tiger reserve and so begins a remarkable journey and an obsession She travels across the world Bhutan to Siberia China to Sumatra into jungles and into myths in search of tigers the most beautiful and one of the most endangered animals in the world In every jungle among the snakes scorpions and animals living their secret lives she meets defenders of the wild scientists guards and conservationists struggling to protect forest animals from armed poachers live electrocuting fences poisoning As she becomes more passionately interested in her elusive subject she contemplates the meaning of obsession where it takes us how it shapes us Indeed it is our obsession with tigers that has brought them to the edge of extinction Tigers stalk the pages of this book more vividly than in any wildlife programme Both a captivating piece of natural history and a beautiful piece of travel literature Tigers in Red Weather is also an absorbing exploration of obsession and of the human heart **Tiger** Perseus,Valmik Thapar,2004-07-06 A passionate first person narrative by Valmik Thapar who has spent most of the last thirty years observing tigers in the wild and fighting to ensure their survival is supplemented by the latest scientific findings and essays by twenty of the world s most renowned experts This stunning book explores every aspect of one of nature s most majestic animals making Tiger The Ultimate Guide as authoritative as it is beautiful Book jacket **Catching tigers in red weather** Todd S.
