Plato's dialogue the Timaeus Critias presents two connected accounts that of the story of Atlantis and its defeat by ancient Athens and that of the creation of the cosmos by a divine craftsman This book offers a unified reading of the dialogue It tackles a wide range of interpretative and philosophical issues Topics discussed include the function of the famous Atlantis story the notion of cosmology as myth and as likely and the role of God in Platonic cosmology Other areas commented upon are Plato's concepts of necessity and teleology the nature of the receptacle the relationship between the soul and the body the use of perception in cosmology and the work's peculiar monologue form The unifying theme is teleology Plato's attempt to show the cosmos to be organised for the good A central lesson which emerges is that the Timaeus is closer to Aristotle's physics than previously thought

Reydam-Schils, 2003 New forms of transnational mobility and diasporic belonging have become emblematic of a supposed global condition of uprootedness Yet much recent theorizing of our so-called postmodern life emphasizes movement and fluidity without interrogating who and what is on the move This book examines the interdependence of mobility and belonging by considering how homes are formed in relationship to movement It suggests that movement does not only happen when one leaves home and that homes are not always fixed in a single location Home and belonging may involve attachment and movement fixation and loss and the transgression and enforcement of boundaries
