Top 10 Baseball Shortstops:

Top 10 Baseball Shortstops Bill Deane, 1999 The shortstop is often the backbone of a baseball team's defense. All good shortstops are excellent in the field with the glove, but for a shortstop to be great, he has to excel at all aspects of the game. These shortstops, from early legends Ernie Banks and Honus Wagner to stars of today such as Cal Ripken Jr and Barry Larkin, are some of the best to ever put on a pair of baseball cleats. Other featured players include Luis Aparicio, Luke Appling, Lou Boudreau, Joe Cronin, Ozzie Smith, and Arky Vaughan.

Baseball's Hall of Fame or Hall of Shame? This fascinating book covers every era of baseball, position by position, and answers the question: Which players really belong in the Hall of Fame? Using eight simple criteria to determine the level of dominance each player exhibited during his career, baseball superexpert Robert Cohen defines the qualities a true Hall of Fame player should possess. Cohen solves or fuels the debate on who belongs in the Hall of Fame and who doesn't. He also discusses the careers of the best players not elected to the Hall of Fame and the circumstances surrounding the greatest injustices in the selection process. A very great player is examined not only in relation to the era in which he played but against all the Hall-worthy stars who ever manned the position.

Baseball's All-Time Best Hitters Michael J. Schell, 2013-12-03 Tony Gwynn is the greatest hitter in the history of baseball. That's the conclusion of this engaging and provocative analysis of baseball's all-time best hitters. Michael Schell challenges the traditional list of all-time hitters, which places Ty Cobb first, Gwynn 16th, and includes just 8 players whose prime came after 1960. Schell argues that the raw batting averages used as the list's basis should be adjusted to take into account that hitters played in different eras with different rules and in different ballparks. He makes those adjustments and produces a new list of the best 100 hitters that will spark debate among baseball fans and statisticians everywhere. Schell combines the two qualifications essential for a book like this: He is a professional statistician applying his skills to cancer research, and he has an encyclopedic knowledge of baseball. He has wondered how to rank hitters since he was a boy growing up as a passionate Cincinnati Reds fan. Over the years, he has analyzed the most important factors, including the relative difficulty of hitting in different ballparks, the length of hitters' careers, the talent pool that players are drawn from, and changes in the game that raised or lowered major league batting averages: the introduction of the designated hitter and changes in the height and location of the pitcher's mound, for example. Schell's study finally levels the playing field, giving new credit to hitters who played in adverse conditions and downgrading others who faced fewer obstacles. His final ranking of players differs dramatically from the traditional list: Gwynn, for example, bumps Cobb to 2nd place; Rod Carew rises from 28th to 3rd; Babe Ruth drops from 9th to 16th; and Willie Mays comes from off the list to rank 13th. Schell's list also gives relatively more credit to modern players, containing 39 whose best days were after 1960. Using a fun, conversational style, the book presents a feast of stories and statistics about players, ballparks, and teams, all arranged so that calculations can be skipped by general readers but consulted by statisticians eager to follow Schell's methods or introduce their students to such basic concepts as mean
