Topics in Geometry Simon Gindikin,1996-06-27 This collection of articles serves to commemorate the legacy of Joseph D Atri who passed away on April 29 1993 a few days after his 55th birthday Joe D Atri is credited with several fundamental discoveries in ge ometry In the beginning of his mathematical career Joe was interested in the generalization of symmetrical spaces in the E Cart an sense Symmetric spaces differentiated from other homogeneous manifolds by their geomet rical richness allows the development of a deep analysis Geometers have been constantly interested and challenged by the problem of extending the class of symmetric spaces so as to preserve their geometrical and analytical abundance The name of D Atri is tied to one of the most successful gen eralizations Riemann manifolds in which local geodesic symmetries are volume preserving up to sign In time it turned out that the majority of interesting generalizations of symmetrical spaces are D Atri spaces natu ral reductive homogeneous spaces Riemann manifolds whose geodesics are orbits of one parameter subgroups etc The central place in D Atri s research is occupied by homogeneous bounded domains in en which are not symmetric Such domains were discovered by Piatetskii Shapiro in 1959 and given Joe s strong interest in the generalization of symmetric spaces it was very natural for him to direct his research along this path **Topics in Geometry** Semen Grigor′evich Gindikin,1996 A collection of articles to commemorate the legacy of Joseph D Atri *Topics in Geometry* Simon Gindikin,2012-12-06 This collection of articles serves to commemorate the legacy of Joseph D Atri who passed away on April 29 1993 a few days after his 55th birthday Joe D Atri is credited with several fundamental discoveries in ge ometry In the beginning of his mathematical career Joe was interested in the generalization of symmetrical spaces in the E Cart an sense Symmetric spaces differentiated from other homogeneous manifolds by their geomet rical richness allows the development of a deep analysis Geometers have been constantly interested and challenged by the problem of extending the class of symmetric spaces so as to preserve their geometrical and analytical abundance The name of D Atri is tied to one of the most successful gen eralizations Riemann manifolds in which local geodesic symmetries are volume preserving up to sign In time it turned out that the majority of interesting generalizations of symmetrical spaces are D Atri spaces natu ral reductive homogeneous spaces Riemann manifolds whose geodesics are orbits of one parameter subgroups etc The central place in D Atri s research is occupied by homogeneous bounded domains in en which are not symmetric Such domains were discovered by Piatetskii Shapiro in 1959 and given Joe s strong interest in the generalization of symmetric spaces it was very natural for him to direct his research along this path **Selected Works of Ilya Piatetski-Shapiro** Il′i□a□ Iosifovich Pi□a□tet□s□kiĭ-Shapiro,2000 Piatetski Shapiro himself with the consultation of the editors selected these 162 papers some of which appear in English for the first time Together they represent almost 50 years of his service to mathematics and though arranged by subject are nearly in chronological order Each of the sections conclude with commentary on the entire work of Piatetski Shapiro s in that area including related developments Following his autobiographical Etude on life and automorphic

Gilding,Robert Kersner,2012-12-06 This monograph has grown out of research we started in 1987 although the foun dations were laid in the 1970 s when both of us were working on our doctoral theses trying to generalize the now classic paper of Oleinik Kalashnikov and Chzhou on nonlinear degenerate diffusion Brian worked under the guidance of Bert Peletier at the University of Sussex in Brighton England and later at Delft University of Technology in the Netherlands on extending the earlier mathematics to include nonlinear convection while Robert worked at Lomonosov State Univer sity in Moscow under the supervision of Anatolii Kalashnikov on generalizing the earlier mathematics to include nonlinear absorption We first met at a conference held in Rome in 1985 In 1987 we met again in Madrid at the invitation of Ildefonso Diaz where we were both staying at La Residencia As providence would have it the University Complutense closed down during this visit in response to student demonstra tions and we were very much left to our own devices It was natural that we should gravitate to a research topic of common interest This turned out to be the characterization of the phenomenon of finite speed of propagation for nonlin ear reaction convection diffusion equations Brian had just completed some work on this topic for nonlinear diffusion convection while Robert had earlier done the same for nonlinear diffusion absorption There was no question but that we bundle our efforts on the general situation
