What has a use in the future unforeseeably is radically useless now. What has an effect now is not necessarily useful if it falls through the gaps. In *For a Pragmatics of the Useless* Erin Manning examines what falls outside the purview of already known functions and established standards of value, not for want of potential but for carrying an excess of it. The figures are various, the intricate, the artful, proprioceptive, tactility, neurodiversity, black life. It is around the latter two that a central refrain echoes: All black life is neurodiverse life. This is not an equation but an approximation of proximity. Manning shows how neurotypicality and whiteness combine to form a normative baseline for existence. Blackness and neurodiversity schizz around the baseline, uselessly pragmatically figuring a more than of life living. Manning in dialogue with Félix Guattari and drawing on the black radical tradition's accounts of black life and the aesthetics of black sociality proposes a schizoanalysis of the more than, charting a panoply of techniques for other ways of living and learning. **123s of Kindness at Bedtime** Patricia Hegarty, 2026-02-03.
