with passion Throughout this collection Oliver positions not just herself upstream but us as well as she encourages us all to keep moving to lose ourselves in the awe of the unknown and to give power and time to the creative and whimsical urges that live within us *Upstream* Dan Heath,2020-03-05 Informs engages and above all entertains Charles Duhigg bestselling author of *The Power of Habit* New York Times bestselling author Dan Heath asks what happens when we take our thinking upstream and try to prevent problems before they happen What happens when we take our thinking upstream and try to prevent problems before they happen Most of us are pretty good at dealing with problems we re used to being resourceful and improvising solutions But we also tend to focus on reacting rather than preventing which costs us unnecessary time and money Across business politics and society bestselling author Dan Heath shows us that we have the capacity to solve some of our thorniest issues we just need to start to think about the system rather than the symptoms Drawing on hundreds of new interviews with unconventional problem solvers Heath shows the huge gains to be made when we stop dealing with symptoms and start to deliver practical solutions Packed with vivid stories and practical examples *Upstream* is the rare book that can both revitalize your business and make our world a better place Daniel H Pink No 1 New York Times bestselling author of *When Drive and To Sell Is Human* [An Abstraction for Version Control Systems](#) Matthias Kleine,Robert Hirschfeld,Gilad Bracha,2012 *Version Control Systems* VCS allow developers to manage changes to software artifacts Developers interact with VCSs through a variety of client programs such as graphical front ends or command line tools It is desirable to use the same version control client program against different VCSs Unfortunately no established abstraction over VCS concepts exists Instead VCS client programs implement ad hoc solutions to support interaction with multiple VCSs This thesis presents Pur an abstraction over version control concepts that allows building rich client programs that can interact with multiple VCSs We provide an implementation of this abstraction and validate it by implementing a client application **Official Gazette of the United States Patent and Trademark Office** ,1995 [Principles of Water Resources](#) Thomas V.
