ANGABEN 1990 XIV 268 pp 48 figs Hardcover DM 78 ISBN 3 540 97171 8 LANGTEXT While expert systems have become a
popular topic in the computing medical and engineering fields the expert system is still a new technology in urban planning
This book introduces expert systems for problem solving in urban planning and describes the way in which heuristic
knowledge and rules of thumb of expert planners can be represented through computer programs The book presents
practical applications of expert systems for solving many important urban planning problems particularly those issues that
many practicing planners face in their daily operations Problems and issues discussed are grouped in the following
categories Land Use Planning Transportation Planning Site Selection and Analysis Environmental Planning Conflict
Mediation and Legal Disputes Future Developments and Directions Expert Systems Applications to Urban Planning will
benefit both urban planners who wish to learn how this new technology might be applied to their daily work as well as
researchers in expert systems seeking new ideas for systems design **Expert Systems** Tschangho J. Kim, 1990-01-01

Management held at Bombay in 1997 Design and Decision Support Systems in Architecture Harry J.P.
Timmermans, 1993-09-30 The papers collected in this volume were originally presented at the conference on Design and
Decision Support Systems in Architecture and Urban Planning that was held in Mierlo the Netherlands in July 1992 This
conference was organized as one of the events celebrating the 25th anniversary of the founding of the Faculty of Architecture
Building and Planning at Eindhoven University of Technology The organizing committee had a strong feeling that many
interesting developments in this area were emerging within different institutional frameworks and informal networks that do
not interact frequently For example scholars working on architectural problems are not particularly familiar with computer
applications in urban planning Likewise although many computer aided design systems claim to be based on principles of
design methodology serious discussions on the methodological underpinnings of such systems are relatively scarce
Consequently we may have little opportunity to learn how scholars in closely related disciplines approach specific design or
