## **Urban And Community Politics:**

**Urban and Community Politics** William A. Schultze, 1974 Race and Authority in Urban Politics David Greenstone, Paul E. Peterson, 1976-08 In this penetrating book the authors provide a systematic empirical analysis of an important public policy issue citizen participation in the Community Action Program of the Johnson administration's War on Poverty This Phoenix edition includes a new introduction in which the authors explicate the most important themes in their analysis In a series of lively chapters Greenstone and Peterson show how the coalitions that formed around the community action question developed not out of electoral or organizational interests alone but were strongly influenced by prevailing conceptions of the nature of authority in America The book stresses the way in which both machine and reform structures affected the ability of minority groups to organize effectively and to form alliances in urban politics It considers the wide ranging critiques made of the Community Action Program by conservative liberal and radical analysts and finds that all of them fail to appreciate the significance and intensity of the racial cleavage in American politics City Trenches Ira Katznelson, 2013-10-02 The urban crisis of the 1960s revived a dormant social activism whose protagonists placed their hopes for radical change and political effectiveness in community action Ironically the insurgents chose the local community as their terrain for a political battle that in reality involved a few strictly local issues They failed to achieve their goals Ira Katznelson argues not so much because they had chosen their ground badly but because the deep split of the American political landscape into workplace politics and community politics defeats attempts to address grievances or raise demands that break the rules of bread and butter unionism on the one hand or of local politics on the other A fascinating record of the encounter between today's reformers the community activists and the powers they challenge City Trenches is also a probing analysis of the causes of urban instability Katznelson anatomizes the unique workings of the American urban system which allow it to contain opposition through machine politics and as a last resort institutional innovation and co-optation for example the authorities own version of decentralization used in the 1960s as a counter to a community control Washington Heights Inwood a multi ethnic working class community in northern Manhattan provides the setting for an absorbing close up view of the historical evolution of local politics the challenge to the system in the 1960s and its reconstitution in the 1970s *Politics and Community-Based Research* Sarah Charlton, Sophie Didier, Kirsten Dörmann, Claire Bénit-Gbaffou, 2019-10-01 *Politics and Community Based Research Perspectives from Yeoville* Studio Johannesburg provides a textured analysis of a contested urban space that will resonate with other contested urban spaces around the world and challenges researchers involved in such spaces to work in creative and politicised ways This edited collection is built around the experiences of Yeoville Studio a research initiative based at the School of Architecture and Planning at the University of the Witwatersrand Johannesburg Through themed illustrated stories of the people and places of Yeoville the book presents a nuanced portrait of the vibrance and complexity of a post apartheid peri central neighbourhood that has often been characterised as a slum in

Johannesburg These narratives are interwoven with theoretical chapters by scholars from a diversity of disciplinary backgrounds reflecting on the empirical experiences of the Studio and examining academic research processes These chapters unpack the engagement of the Studio in Yeoville including issues of trust the need to align policy with lived realities and social needs the political dimensions of the knowledge produced and the ways in which this knowledge was and could be used

*Urban Politics and Public Policy* Robert L. Lineberry, Ira Sharkansky, 1971

*Remaking New York* William Sites, 2003 Inequality increases instability grows communities fragment this is the fate of a city in the wake of globalization but is globalization really the cause Proposing a new perspective on politics globalization and the city this provocative book argues that such urban problems result in part from U S policies that can be changed William Sites develops the concept of primitive globalization identifying a pattern of reactive politics ad hoc measures to subsidize business displace the urban poor and dismantle the welfare state that uproots social actors corporations citizens urban residents and facilitates a damaging short term oriented type of international integration In light of this theory Sites examines the transformation of New York City since the 1970s focusing on the logic of political action at national local and neighborhood levels In the process the story of late twentieth century New York and its Lower East Side community emerges as something different not a tale of globalist transformation or of local resurgence but a distinctly American case one in which urban politics and the state in their own right exacerbate inequality and community fragmentation within the city

*The Politics of Community Building in Urban China* Thomas Heberer, Christian Göbel, 2011-03-29 This book aims to make sense of the recent reform of neighbourhood institutions in urban China It builds on the observation that the late 1990s saw a comeback of the state in urban China after the increased economization of life in the 1980s had initially forced it to withdraw Based on several months of fieldwork in locations ranging from poor and dilapidated neighbourhoods in Shenyang City to middle class gated communities in Shenzhen the authors analyze recent attempts by the central government to enhance stability in China s increasingly volatile cities In particular they argue that the central government has begun to restructure urban neighbourhoods and has encouraged residents to govern themselves by means of democratic procedures Heberer and Göbel also contend that whilst on the one hand the central government has managed to bring the Party state back into urban society especially by tapping into a range of social groups that depend on it it has not however managed to establish a broad base for participation In testing this hypothesis the book examines the rationales strategies and impacts of this comeback by systematically analyzing how the reorganization of neighbourhood committees was actually conducted and find that opportunities for participation were far more limited than initially promised The book will be of interest to students and scholars of Chinese Studies Development Studies Urban Studies and Asian Studies in general

Okiror, 2017-12-19 This book presents findings of further research into the concept I started in my previous book the importance of dying to self and its implications for outreach to unchurched children in isolated communities It was centered on our Lord Jesus's call for all to deny themselves in order to follow him If anyone would come after me he must deny himself and take up his cross daily and follow me Luke 9 23 Gods ways are not our ways Isaiah 55 8 We have to lose in order to gain Philippians 3 78 we have to lose ourselves in order to find ourselves Matthew 10 39 we have to die in order to live John 12 24 and if you want victory you have to first surrender watch the War Room movie This book delves deeper into the practical aspects of reaching a specific demographic of unchurched children in Jane Finch      **Politics and Community Planning** John Howard Bigelow, 1969      Politics and Urban Policies Brett W. Harrigan, David C. Nice, 2001 With a theme of rejuvenation and reform this up to date highly readable text focuses on twin perspectives the political economy of state and local politics and the impact of political reformism on states and communities This book studies reformism and its consequences as they relate to the legal cultural and financial framework of state and community politics as well as their effect on citizen influence community politics and the institutions of state government      *The CQ Press Guide to Urban Politics and Policy in the United States* Christine Kelleher Palus, Richardson Dilworth, 2016-02-11 The CQ Press Guide to Urban Politics and Policy in the United States will bring the CQ Press reference guide approach to topics in urban politics and policy in the United States If the old adage that all politics is local is even partially true then cities are important centers for political activity and for the delivery of public goods and services U S cities are diverse in terms of their political and economic development demographic makeup governance structures and public policies Yet there are some durable patterns

across American cities too Despite differences in governance and or geographic size most cities face similar challenges in the management of public finances the administration of public safety and education And all U S cities have a similar legal status within the federal system This reference guide will help students understand how American cities from old to new have developed over time Part I how the various city governance structures allocate power across city officials and agencies Part II how civic and social forces interact with the organs of city government and organize to win control over these organs and or their policy outputs Part III and what patterns of public goods and services cities produce for their residents Part IV The thematic and narrative structure allows students to dip into a topic in urban politics for deeper historical and comparative context than would be possible in either an A to Z encyclopedia entry or in an urban studies course text FEATURES Approximately 40 chapters organized in major thematic parts in one volume available in both print and electronic formats Front matter includes an Introduction by the Editors along with biographical backgrounds about the Editors and the Contributing Authors Back matter includes a compilation of relevant topical data or tabular presentation of major historical developments population growth size of city budgets etc or historical figures e g mayors a bibliographic essay and a detailed index Sidebars are provided throughout and chapters conclude with References Further Readings and Cross References to related chapters as links in the e version This Guide is a valuable reference on the topics in urban politics and policy in the United States The thematic and narrative structure allows researchers to dip into a topic in urban politics for a deeper historical and comparative context than would be possible in either an A to Z encyclopedia entry or in an urban studies course text

**Post-Agreement Northern Irish Literature** Birte Heidemann,2016-06-23 This book uncovers a new genre of post Agreement literature consisting of a body of texts fiction poetry and drama by Northern Irish writers who grew up during the Troubles but published their work in the aftermath of the Good Friday Agreement In an attempt to demarcate the literary aesthetic parameters of the genre the book proposes a selective revision of postcolonial theories on liminality through a subset of concepts such as negative liminality liminal suspension and liminal permanence These conceptual interventions as the readings demonstrate help articulate how the Agreement s rhetorical negation of the sectarian past and its aggressive neoliberal campaign towards a progressive future breed new forms of violence that produce liminally suspended subject positions
