## **Urban Health In America:**

Urban Health in America Amasa B. Ford,1976      *Urban Health* Steven Whitman,Ami Shah,Maureen Benjamins,2011

The 1980s opened a discussion of the varying nature of health in different segments of the United States Falling under the rubric of health disparities a great deal of research has been published demonstrating the substantial differences in health status within a population The causes of health disparities are varied and not always clear but most researchers agree that disparities are a reflection of social and economic inequities and political injustice One of the obstacles to addressing disparities is the lack of meaningful health data especially for vulnerable populations which is often nonexistent despite being a critical factor for informing health programs and policies at the local level This book provides a model for combating health disparities by describing how the authors gathered local health information engaged the community at every step of the process and created movement toward evidence based sustainable change This book describes how a landmark health survey in Chicago generated dramatic data that are allowing investigators throughout the city to move from data to action and from observation to intervention In providing a detailed description of how the community focused collection and analysis of health data can serve as an impetus for improved well being *Urban Health* is an invaluable resource for researchers community groups students and professionals      *Cities and Sickness* Ann Lennarson Greer,Scott A. Greer,1983-12 This volume argues that in a society where the metropolis dominates it is a sterile view only to see health illness prevention and care outside of the urban context Opinions and contributions are drawn from economics sociology political science and health care planning Any college library that supports programs in economics health administration or urban affairs should have this most recent volume of SAGE s *Urban Affairs Annual Reviews* Choice July August 1984 of interest to all who want to explore new lines of thought about health and cities It has lessons for all especially if the reader makes the effort to translate events attitudes and service provision into more familiar settings      *Handbook of Urban Health* Sandro Galea,David Vlahov,2006-10-12 As more people worldwide live in cities increasingly we need to understand how cities and city living affect population health Does city living negatively affect health Conversely can city living enhance population health and well being Over forty experts from around the world bring a depth of ideas to the *Handbook of Urban Health* making the *Handbook* a focused resource for a range of health disciplines The *Handbook* presents 1 A discussion of the health of specific urban populations among them immigrants children the elderly racial and sexual minorities the homeless and the poor 2 Methods relevant to the study of urban health including epidemiology research methods funding and policy issues urban planning 3 Practical issues for developing healthy cities including interventions preventive strategies providing health services and teaching urban health 4 International perspectives from developing countries and the World Health Organization 5 Integrative chapters that conclude each of the book s sections bringing together theoretical models with the big picture A unique professional idea book research resource and teaching text the *Handbook of Urban Health* challenges

**Urban Place** Peggy F. Barlett, 2005-08-26 Amidst city concrete and suburban sprawl Americans are discovering new ways to reconnect with the natural world From community gardens in New York s Lower East Side to homeless shelters in California the search for a more sustainable future has led grassroots groups to a profound reconnection to place and to the natural world Studies of the health consequences of renewing a connection with nature support the urgency of providing green surroundings as cities expand and the majority of the earth s population lives in urban areas Medical research results from groups as diverse as healthy volunteers surgery patients and heart attack survivors suggest that contact with nature may improve health and well being Engagement with nearby natural places also provides restoration from mental fatigue and support for more resilient and cooperative behavior Aspects of stronger community life are fostered by access to nature suggesting that there are significant social as well as physical and psychological benefits from connection with the natural world This volume brings together research from anthropology sociology public health psychology and landscape architecture to highlight how awareness of locale and a

meaningful renewal of attachment with the earth are connected to delight in learning about nature as well as to civic action and new forms of community. Community garden coalitions, organic market advocates, and greenspace preservationists resist the power of global forces enacting visions of a different future. Their creative efforts tell a story of a constructive and dynamic middle ground between private plots and public action between human health and ecosystem health between individual attachment and urban sustainability.

**The Routledge Handbook of Urban Studies in Latin America and the Caribbean** Jesús M. González-Pérez, Clara Irazábal, Rubén C. Lois-González, 2022-07-19 This handbook presents the great contemporary challenges facing cities and urban spaces in Latin America and the Caribbean. The content of this multidisciplinary book is organized into four large sections focusing on the histories and trajectories of urban spatial development, inequality and displacement of urban populations, contemporary debates on urban policies, and the future of the city in this region. Scholars of diverse origins and specializations analyze Latin American and Caribbean cities showing that despite their diversity they share many characteristics and challenges and that there is value in systematizing this knowledge to both understand and explain them better and to promote increasing equity and sustainability. The contributions in this handbook enhance the theoretical, empirical, and methodological study of urbanization processes and urban policies of Latin America and the Caribbean in a global context, making it an important reference for scholars across the world. The book is designed to meet the interdisciplinary study and consultation needs of undergraduate and graduate students of architecture, urban design, urban planning, sociology, anthropology, political science, public administration, and more.

**Defining the Urban** Deljana Iossifova, Christopher N.H. Doll, Alexandros Gasparatos, 2017-10-06 What is urban? How can it be described and contextualised? How is it used in theory and practice? Urban processes feature in key international policy and practice discourses. They are at the core of research agendas across traditional academic disciplines and emerging interdisciplinary fields. However, the concept of the urban remains highly contested, both as material reality and imaginary construct. The urban remains imprecisely defined. *Defining the Urban* is an indispensable guide for the urban transdisciplinary thinker and practitioner. Parts I and II focus on how Academic Disciplines and Professional Practices respectively understand and engage with the urban. Included among others are Architecture, Ecology, Governance, and Sociology. Part III, *Emerging Approaches*, outlines how elements from theory and practice combine to form transdisciplinary tools and perspectives. Written by eminent experts in their respective fields, *Defining the Urban* provides a stepping stone for the development of a common language, a shared ontology, in the disjointed fields of urban research and practice. It is a comprehensive and accessible resource for anyone with an interest in understanding how urban scholars and practitioners can work together on this complex theme.

Spatial Investigations across the Urban South* Beatrice De Carli, Francesco Chiodelli, Maddalena Falletti, 2014-07-08 Across the global South the rapid urbanisation and uneven development that have occurred over the past few decades have brought to the surface a tight connection between social conflicts and urban space Indeed the physical conformation of urban space is one of the primary factors that trigger social tensions with repercussions at the metropolitan regional and national scales Such tensions are related to the conditions of social and spatial inequality which characterise many urban areas across the South they can also be connected to contingent political and institutional orders which find in the materiality of space both the means and the cause of conflicts among different groups amidst diverging territorial demands and the overlapping of competing struggles for power At the same time new possibilities arise in the concreteness of space including innovative forms of local activism adapting strategies of self organisation and unconventional relations between the formal and the informal city On acknowledging the multifaceted nature of the urban space there arises a question which constitutes the core problem addressed by the book are cities to be tamed This volume gathers a series of cross disciplinary contributions on these topics spanning from architecture and urban design to planning social theory and geography These contributions revolve around two core themes The first concerns the agency of design in contexts of informality and centres on the missing unexpected pursued exchange between projects and realities The second concerns the complex relationship between spatial planning politics and conflicts in contexts characterised by marked ethnic

political and social tensions Contributors Alessandro Balducci Scott A Bollens Jeffrey Chan Kok Hui Francesco Chiodelli Laure Criqui Viviana d Auria Beatrice De Carli Bruno De Meulder Annalies De Nijs Maddalena Falletti Nabeel Hamdi Joud M I Khasawneh Hamed Khosravi Olivier Legrand Colin Marx Carmen Mendoza Arroyo Lina Scavuzzo Erez Tzfadia Ignacio Castillo Ulloa Faith Wong and Oren Yiftachel
