Biohacker's Magazine Biohacker's Magazine , In a world with so much information that is continually thrown at us sometimes it s tough to know what to accept as Truth and what to reject as false So many things call for our attention that we can become mentally strained and exhausted by the end of the day Because of this we are susceptible to the coaxing idea of giving up our thinking especially our critical thinking We know we can t think about every little thing and decision that crosses our mind throughout the day so we have many of our thoughts on auto pilot which is fine as this helps us from becoming absolutely drained by the end of our day The problem arises when we let this auto thinking expand beyond the everyday task level of thinking and decision making Out of comfort we can allow ideas and words that flash before us throughout our daily lives to merge into our inner brain s reservoir without first weighing the information against our experiences and own inner knowledge of our understanding of the Truth This is essential when we let others that generate ideas thoughts agendas etc think for ourselves because we simply feel too overloaded with the amount of information we have to continually process that we give up our own free right to ponder something It s quite scary when we think about the ramifications that can come of this especially when the world today shows us that those that don t think for themselves are perfect subjects to a form of modern day slavery to whatever ideas and reality the powers want to build up This is why it s so important to take the time to invest in ourselves from the

beginning and make learning reading and curiosity a habit It takes time but the earlier we begin the more time we save in the long run from having to put great time and attention into each thought that enters our mind and decide whether it fits with our values or not We must be like children constantly questioning the world and using our forged experiences to add to our answers and depth of self knowledge In the same manner we must respectfully study and learn from all those who have gone before us and be open to learning about their ways and perspectives Remember that knowledge is not solely subjective it is also objective and is the understanding of a real concrete thing under the aspect of a grasped meaning We use our intellect to study and think rationally about things which adds to our understanding of the truth about ourselves our community and our world The choices that we make are dependent upon our will whether good or bad which is in turn dependent upon our understanding of the truth Man is the only animal that can say I eat and I know that I eat I am and I know that I am I think and I know that I think To know we must think critically about subjects that truly hold value We must make the most of our intellect and discover new data from our experiments from biohacking to add to our knowledge in the search for the truth that propels all of us humans forward to the beat of Life s constant drum If you look for truth you may find comfort in the end if you look for comfort you will not get either comfort or truth only soft soap and wishful thinking to begin and in the end despair C S Lewis
