The Hand Frank R. Wilson, 1998

The human hand is so beautifully formed its actions are so powerful so free and yet so delicate that there is no thought of its complexity as an instrument we use it as we draw our breath unconsciously. With these words written in 1833 Sir Charles Bell expressed the central theme of some of the most far reaching and exciting research being done in science today. For humans the lifelong apprenticeship with the hand begins at birth. We are guided by our hands and we are indelibly shaped by the knowledge that comes to us through our use of them. *The Hand* delineates the ways in which our hands have shaped our development cognitive emotional linguistic and
