Posner,Cass R. Sunstein,2010-04-15 Since the earliest days of philosophy thinkers have debated the meaning of the term happiness and the nature of the good life But it is only in recent years that the study of happiness or hedonics has developed into a formal field of inquiry cutting across a broad range of disciplines and offering insights into a variety of crucial questions of law and public policy *Law and Happiness* brings together the best and most influential thinkers in the field to explore the question of what makes up happiness and what factors can be demonstrated to increase or decrease it Martha Nussbaum offers an account of the way that hedonics can productively be applied to psychology Cass R Sunstein considers the unexpected relationship between happiness and health problems

Matthew Adler and Eric A Posner view hedonics through the lens of cost benefit analysis David A Weisbach considers the relationship between happiness and taxation and Mark A Cohen examines the role crime and fear of crime can play in people's assessment of their happiness and much more The result is a kaleidoscopic overview of this increasingly prominent field offering surprising new perspectives and incisive analyses that will have profound implications on public policy
