

# Individual Therapy Techniques

---

## Free association

This technique delves into unconscious processes and childhood experiences to understand and address current psychological issues. It involves exploring deep-seated emotions and conflicts to promote insight and healing.

**How it works:** The client verbalizes their thoughts, feelings, and memories as they arise, regardless of how trivial, irrational, or embarrassing they may seem.

## Cognitive restructuring

Cognitive restructuring is a technique that practitioners can utilize with their clients in session to identify negative and inaccurate thoughts. They work together to replace them with alternative thoughts and beliefs that are more realistic and supportive.

**How it works:** The therapist helps the client notice automatic negative thoughts (e.g., "I'm worthless") and then works to identify cognitive distortions (e.g., catastrophizing, black-and-white thinking). Together, the therapist and client reframe those thoughts with healthier, more rational alternatives (e.g., "I have made mistakes, but I am not worthless").
