

The background of the book cover is a painting of a vast, flat landscape, possibly a salt flat or a wide beach at low tide. The ground is covered in a dense pattern of small, dark, irregular shapes, creating a textured, almost mosaic-like effect. In the middle ground, several dark birds are scattered across the landscape. In the far distance, a dark, low horizon line separates the ground from a pale, overcast sky. Two birds are shown in flight against the sky in the upper right quadrant.

TIDE'S

Tides Ending:

Tides Ending, 1999-11 **Tide's Ending** B. B.,1980-01-01 *Tide's Ending*, 1950 Philosophical Transactions and Collections, to the End of the Year 1700 Royal Society (Great Britain),1722 **The Philosophical Transactions and Collections, to the End of the Year 1700: Containing all the physiological papers, by J. Lowthorp** Royal Society (Great Britain),1716 **The Philosophical Transactions and Collections, to the End of the Year 1700, Abridg'd and Dispos'd Under General Heads ... By John Lowthorp ...: Containing all the physiological papers, by J. Lowthorp** Royal Society (Great Britain),1716 **The Philosophical Transactions and Collections from the End of the Year 1665 to the End of the Year 1733**, 1722 Sea Levels, Land Levels, and Tide Gauges K.O. Emery,David G. Aubrey,2012-12-06

Changes in sea level caused by global warming can be disastrous to modern civilization Therefore it is important to use accurate and reliable methods to monitor any change During this century and in particular the last three decades tide gauge records have been used to show these changes related to the world s oceans Aubrey and Emery suggest however that tidal gauges should not be used unquestioningly as a benchmark for measuring eustatic sea level changes Tectonism subsidence ocean current variability and human activity can and do affect the accuracy of these records Understanding the reasons for changes in land and sea levels is essential for the proper development of coastal regions The results of this study provide guiding data for scientific engineering and policy solutions to coastal flooding Determining the true causes of relative subsidence and how to use geological and oceanological controls will allow us to exist within our natural environment rather than force nature to conform to our legal and temporary remedies **Hydrology of Fritchie Marsh, Coastal Louisiana** Eve L. Kuniansky,1985 A preliminary study of Fritchie Marsh near Slidell Louisiana was conducted to determine its general hydrology The marsh is being considered as a disposal site for sewage effluent from the city of Slidell Knowledge of the effects of specific locations of the sewage outfall to provide maximum mixing and detention time in the marsh is needed Mixing and detention capabilities of the marsh are dependent upon the flow characteristics for various hydrologic conditions Model results and field data indicate that during neap tide with little or no rain large parts of the marsh are stagnant and sewage effluent at existing and projected flows has minimal effect on marsh flows During a high tide with a 0 5 foot tide differential across the marsh steady state simulations indicate very low velocities with less stagnant water in the marsh
