Torpedo Bomber:

Torpedo Bombers, 1900-1950 Jean-Denis Lepage, 2020-01-27 The torpedo bomber was a very short lived weapon system operational for scarcely half a century from just prior WWI to the 1960s Yet during its brief existence it transformed naval warfare extending the ship killing range of ships and coastal defences to hundreds of miles The Royal Navy and Fleet Air Arm led the way recording the first sinking of a ship by aerial torpedo in August 1915 but all major navies eagerly developed their own torpedo bomber forces The torpedo bomber reached its zenith in WWII particularly from 1940-42 with notable successes at the Battle of Taranto the sinking of the Bismarck and Pearl Harbor It was the weapon of choice for both the US and Japanese in the big Pacific battles such as Midway In the latter stages of the war increasingly effective anti aircraft fire and interceptor aircraft started to render it obsolete a process completed post war by long range anti ship missiles Jean Denis Lepage traces the development of torpedo bombers worldwide describing their tactics operational history and the aircraft themselves including such well loved types as the Swordfish Beaufighter and Avenger Over 300 aircraft are beautifully illustrated

Torpedo Bombers Peter C. Smith, 2008-03-27 This is a highly illustrated history one of the most deadly types of attack aircraft The torpedo bomber first appeared during the later years of World War One but served their most useful role in the Second World War The most famous attacks include Taranto where Fairey Swordfish destroyed the Italian Battle fleet and the infamous surprise attack on Pearl Harbor by the Japanese In both these cases the attacks were against ships laying in harbor and therefore stationary Heavy defensive anti aircraft fire was the greatest danger to the torpedo bombers in those circumstances but ships under way in the open sea had far more room to take evasive action The lengthy time it took a torpedo to reach its target allowed many ships to escape destruction However notable exceptions were the sinking HMS Prince of Wales and HMS Repulse by the Japanese during the early stages of the war in the Far East During the hunt for the Bismarck it was an air launched torpedo from a Swordfish that severely damaged the ships steering gear and enabled the Royal Navy to close in for the final kill Some of the types included are the Fairey Swordfish Bristol Beaufort Fairey Albacore Bristol Beaufighter Heinkel He 115 Marchetti SM 79 Fokker T VIII Grumman Avenger and the Nakajima B5N

Ralph Barker,1974 *All Hands* ,1945 Ship Busters! Ralph Barker,2012-11-15 A vividly told history of torpedo attacks from the air in the Second World War by a member of the Royal Air Force The Sunday Times Low level strikes against enemy shipping by torpedo carrying aircraft were perhaps the most dangerous forms of air attack developed during WWII and few isolated actions had such a direct impact on naval and military actions This book tells the story of the RAF men involved from the early attacks by single Beaufofts off the Dutch and Norwegian coasts to the massed assaults of later years by the famous strike wings The author who joined the RAF in 1940 as a wireless operator air gunner and served in the UK the Middle East and West Africa and whose career on torpedo work ended in a crash in which his pilot and navigator were killed includes many historic actions the lone moonlight attack by a twenty two year old flight sergeant on the pocket battleship L tzow the torpedoing of the Gneisena in Brest harbor the Channel Dash of the Scharnhorst Gneisena and Prinz Eugen and the heroic Swordfish attacks and the vital strikes from Malta in 1942 against the Italian fleet and the supply shipping of the Afrika Korps The result is a fascinating book vivid in its true picture of aircrew life stirring in its descriptions of heroic actions intensely moving in its record of human endeavor **Inquiry Into Operations of the United States Air Services** United States. Information Bulletin ... Soviet Union. Posol'stvo (U.S.),1944 **Naval Anti-Aircraft Guns and Gunnery** Norman Friedman,2014-01-21 This book does for naval anti aircraft defence what the author s Naval Firepower did for surface gunnery it makes a highly complex but historically crucial subject accessible to the layman It chronicles the growing aerial threat from its inception in the First World War and the response of each of the major navies down to the end of the Second

highlighting in particular the widely underestimated danger from dive bombing Central to this discussion is an analysis of what effective AA fire control required and how well each navy s systems actually worked It also takes in the weapons themselves how they were placed on ships and how this reflected the tactical concepts of naval AA defence As would be expected from any Friedman book it offers striking insights he argues for example that the Royal Navy so often criticised for lack of air mindedness was actually the most alert to the threat but that its systems were inadequate not because they were too primitive but because they tried to achieve too much The book summarises the experience of WW2 particularly in theatres where the aerial danger was greatest and a concluding chapter looks at post 1945 developments that drew on wartime lessons All important guns directors and electronics are represented in close up photos and drawings and lengthy appendices detail their technical data It is simply another superb contribution to naval technical history by its leading exponent
