*Recent Advances in Parallel Virtual Machine and Message Passing Interface* Jack Dongarra, Emilio Luque, Tomas Margalef, 2003-07-31 Parallel Virtual Machine PVM and Message Passing Interface MPI are the most frequently used tools for programming according to the message passing paradigm which is considered one of the best ways to develop parallel applications This volume comprises 67 revised contributions presented at the Sixth European PVM MPI Users Group Meeting which was held in Barcelona Spain 26 29 September 1999 The conference was organized by the Computer Science Department of the Universitat Aut noma de Barcelona This conference has been previously held in Liverpool UK 1998 and Cracow Poland 1997 The first three conferences were devoted to PVM and were held at the TU Munich Germany 1996 ENS Lyon France 1995 and University of Rome 1994 This conference has become a forum for users and developers of PVM MPI and other message passing environments Interaction between those groups has proved to be very useful for developing new ideas in parallel computing and for applying some of those already existent to new practical fields **Parental Belief**

**Systems** Irving E. Sigel, Ann V. McGillicuddy-DeLisi, Jacqueline J Goodnow, 2014-02-25 Research on the topic of parent beliefs or parent cognition has increased tremendously since the original publication of this volume in 1985 For this revised second edition the editors sought to reflect some of the new directions that research on parent cognition has taken By offering a greater variety of topics it gives evidence of the intellectual concerns that now engage researchers in the field and testifies to the expanding scope of their interests Although a unique collection because it reflects the diversity that exists among major researchers in the field it evinces a common theme that the ideas parents have regarding their children and themselves as parents have an impact on their actions This emphasis on parents ideas shifts the focus on sources of family influence to ideas or beliefs as determinants of family interactions The implication of this way of thinking for practitioners is that it suggests the shift to ideas and thoughts from behavior and attitudes **BizTalk Server 2016** Agustín Mántaras, 2018-12-26
