Gabelentz and the Science of Language James McElvenny, 2025-10-01 The German sinologist and general linguist Georg von der Gabelentz 1840-1893 occupies a crucial place in linguistic scholarship around the end of the nineteenth century As professor at the University of Leipzig and then at the University of Berlin Gabelentz was present at the main centers of linguistics of the time He was however generally critical of the narrow technical focus of mainstream historical comparative linguistics as practiced by the Neogrammarians and instead emphasized approaches to language inspired by a line of researchers stemming from Wilhelm von Humboldt Gabelentz alternative conception of linguistics led him to several pioneering insights into language that anticipated elements of the structuralist revolution of the early twentieth century Gabelentz and the Science of Language brings together four essays that explore Gabelentz contributions to linguistics from a historical perspective In addition it makes one of his key theoretical texts Content and Form of Speech available to an English speaking audience for the first time

Cultural Education - Cultural Sustainability Zvi Bekerman, Ezra Kopelowitz, 2008-02-06 This volume is a path breaking contribution to the study of efforts of diaspora indigenous and minority groups broadly defined to use education formal and informal to sustain cultural continuity while grappling with the influences and demands of wider globalizing nationalizing or other homogenizing and assimilatory forces Particular attention is given to groups that use educational elements other than second language teaching alone in programs to sustain their particular cultural

traditions The focus of the book on cultural sustainability changes the nature of questions posed in multicultural education from those that address the opening of boundaries to issues of preserving boundaries in an open yet sustainable way As forced and elective immigration trends are changing the composition of societies and the educational systems within them bringing a rich diversity of cultural experience to the teaching learning process diaspora indigenous and minority groups are looking more and more for ways to sustain their cultures in the context of wider socio political influences This volume is a first opportunity to consider critically multicultural efforts in dialogue with educational options that are culturally particularistic but at the same time tolerant Academics will find this an excellent reference book Practitioners will draw inspiration in learning of others efforts to sustain cultures and will engage in critical reflection on their own work vis vis that of others Teachers will realize they do not stand alone in their educational efforts and will uncover new strategies and methodologies through which to approach their work
