O'Connell, Capt John F. O'Connell Usn (Ret), 2006 The book reviews the actual effectiveness of military air power in accomplishing desired military and political goals in a number of conflicts following WWII During the Korean War and the Vietnam War U S air power attempted a re run of WWII aerial activities However in both conflicts political constraints prevented the United States from achieving its desired political results although the 1972 B 52 strategic bombing campaign against Hanoi worked to bring the North Vietnamese back to the negotiating table The Falklands Malvinas War pitted the UK against Argentina in a remote corner of the South Atlantic Air power allowed a U K victory barely The USSR held air supremacy over Afghanistan but was unable to subdue tough Afghan guerrillas and was finally forced to withdraw after Stinger missiles were introduced The Gulf War demonstrated the increasing effectiveness of precision aerial weaponry The conflict in Kosovo finally produced a result long sought by air power enthusiasts an end to fighting brought about by air attack alone **The Influence of the Sea on**

Daugherty,2003 Marines in the Korean War Commemorative Series Discusses the contributions the British Marines and the Korean Marines made to the Allied Forces in the Korean War **History of United States Naval Operations** James A. Field, Jr.,Ernest McNeill Eller,2001-12-01 Americans think of the Korean War as death and hardship in the bitter hills of Korea It was certainly this and for those who fought this is what they generally saw Yet every foot of the struggles forward every step of the retreats the overwhelming victories the withdrawals and last ditch stands had their seagoing support and overtones The spectacular ones depended wholly on amphibious power the capability of the twentieth century scientific Navy to overwhelm land bound forces at the point of contact Yet the all pervading influence of the sea was present even when no major landing or retirement or reinforcement highlighted its effect When navies clash in gigantic battle or hurl troops ashore under irresistible concentration of ship borne guns and planes nations understand that sea power is working It is not so easy to understand that this tremendous force may effect its will silently steadily irresistibly even though no battles occur No clearer example exists of this truth in wars dark record than in Korea Communist controlled North Korea had slight power at sea except for Soviet mines So beyond this strong underwater phase the United States Navy and allies had little opposition on the water It is therefore easy to fail to recognize the decisive role navies played in this war fought without large naval battles History and the Sea Clark G. Reynolds,1989 The ten essays presented here are the result of a quarter century of thinking by Reynolds history College of Charleston about the strategic uses of the sea by true maritime great powers and by land bound continental nations His thesis is that geographic and strategic facotrs have largely shaped the characteristics of these states his major evidence derives from their use of navies Annotation copyrighted by Book News Inc Portland OR *The Operations of War Explained and Illustrated* Edward Bruce Hamley,1909
