The Search for Equity in School Finance Stephen J. Carroll, Rolla Edward Park, 1983 *The Search for Equity in School Funding* National Conference of State Legislatures, 1996 After decades of media attention study and lawsuits the solution to inequities in school funding remains elusive This paper examines several strategies that states have used to try to close the funding disparities in per pupil spending It explains the two definitions of equity in the school finance arena and identifies some important trends in school finance litigation Also described are some of the strategies used by states to address problems arising from differences in school spending such as increasing state spending in low wealth districts placing legislative spending caps on wealthy districts and recapturing or redistributing revenue The role of state courts in directing remedies to unequal state funding is outlined in the next part Policymakers also face challenges resulting from a projected growth in elementary secondary enrollments and the increased need for state support of school district capital outlay State policymakers are advised to be sensitive both to taxpayer equity and to concerns for educational equity maintain the stability of the funding system include a measure of school district fiscal capacity in the state funding approach examine both the positive and negative circumstances associated with the use of earmarked lottery revenue be attuned to the principle of program neutrality consider the funding systems in total and distribute state resources in such a way that promotes the most efficient use of those resources at the local level In addition the federal role in education finance may need to be redefined One table and one figure are included Appendices contain states nontax revenues lotteries for education educational goals for Kentucky Alabama s essential principles programs under the Elementary Secondary Education Program ideas for a broader federal role in education finance a glossary and professional organizations strategies to address equity Contains 30 endnotes and 26 references LMI Search For Equity in School Finance Rand Corporation, S.J. Strategies for School Equity Marilyn Gittell, 1998-01-01 In the pursuit of a first rate education for all students America s public schools have struggled to achieve fuller racial integration and higher academic standards Yet sharp inequities between prosperous school districts and poorer districts remain reinforced by traditional ways of funding and administering public education This book brings together cutting edge ideas and strategies of prominent advocates of school equity reform Discussing their first hand experiences in forming coalitions framing court cases and dealing with state politics in New Jersey Texas Illinois Michigan Alabama Kentucky and Washington the contributors consider what succeeded and what failed in the search for financial and legal remedies to educational inequity The varied case studies of this book underscore the importance of a comprehensive approach combining finance restructuring and governance reforms for the success of a city or state school reform effort The authors investigate how state constitutions have been used to challenge a state s financial

distribution of school aid how business and community organizations have engaged in reform efforts and how others have negotiated legislation to achieve change This discussion of reform strategies will interest not only those who are concerned with excellence and equity in education but also those who wish to form successful coalitions and challenge existing state policies [Resources in Education](#) ,1984

A Higher Education Equity Walk in The Struggle for American Identity
Lenford Sutton ,2024-02-03 A Higher Education Equity Walk in the Struggle for American Identity offers a compelling case study by Lenford Sutton recounting the author s parallel experience as the first black man to serve as the tempered radical in a historically white learning community In the Southwest Drawing parallels with the tragic fate of Ahmad Aubry in an unwelcoming community Sutton sheds light on the visible and unseen cultural frameworks racial habits and value gaps leaders from non dominant groups navigate when pursuing Diversity Equity and Inclusion goals and objects within the university strategic plans of Historically White Institutions In addition it captures deep reflection from the experience reframing problems in the spirit of Design Thinking with particular emphasis on Empathy as the Gateway to problem solving Recognizing that Digital transformation both cultural and demographic shifts are the drivers of enormous changes that foster fear and increased uncertainty the text emphasizes the new learnings and recommendations for leaders operating in similar circumstances It connotes that tempered radicals often reside at the intersection of innovation and the status quo and in the current cultural and technological disruption of higher education can serve the institution well if deployed appropriately by university leadership to scale its culture

Funding Public Schools Kenneth K. Wong,1999 This book examines the fundamental role of politics in funding our public schools and fills a conceptual imbalance in the current literature in school finance and educational policy Unlike those who are primarily concerned about cost efficiency Kenneth Wong specifies how resources are allocated for what purposes at different levels of the government In contrast to those who focus on litigation as a way to reduce funding gaps he underscores institutional stalemate and the lack of political will to act as important factors that affect legislative deadlock in school finance reform Wong defines how politics has sustained various types of rules that affect the allocation of resources at the federal state and local level While these rules have been remarkably stable over the past twenty to thirty years they have often worked at cross purposes by fragmenting policy and constraining the education process at schools with the greatest needs Wong s examination is shaped by several questions How do these rules come about What role does politics play in retention of the rules Do the federal state and local governments espouse different policies In what ways do these policies operate at cross purposes How do they affect educational opportunities Do the policies cohere in ways that promote better and more equitable student outcomes Wong concludes that the five types of entrenched rules for resource allocation are rooted in existing governance arrangements and seemingly impervious to partisan shifts interest group pressures and constitutional challenge And because these rules foster policy fragmentation and embody initiatives out of step with the performance based reform agenda of the 1990s the outlook for positive change in

public education is uncertain unless fairly radical approaches are employed Wong also analyzes four allocative reform models two based on the assumption that existing political structures are unlikely to change and two that seek to empower actors at the school level The two models for systemwide restructuring aimed at intergovernmental coordination and or integrated governance would seek to clarify responsibilities for public education among federal state and local authorities above all integrating political and educational accountability The other two models identified by Wong shift control from state and district to the school one based on local leadership and the other based on market forces In discussing the guiding principles of the four models Wong takes care to identify both the potential and limitations of each Written with a broad policy audience in mind Wong s book should appeal to professionals interested in the politics of educational reform and to teachers of courses dealing with educational policy and administration and intergovernmental relations

Equity and Adequacy in Education Finance National Research Council, Commission on Behavioral and Social Sciences and Education, Committee on Education Finance, 1999-02-12 Spending on K 12 education across the United States and across local school districts has long been characterized by great disparities disparities that reflect differences in property wealth and tax rates For more than a quarter century reformers have attempted to reduce these differences through court challenges and legislative action As part of a broad study of education finance the committee commissioned eight papers examining the history and consequences of school finance reform undertaken in the name of equity and adequacy This thought provoking timely collection of papers explores such topics as What do the terms equity and adequacy in school finance really mean How are these terms relevant to the politics and litigation of school finance reform What is the impact of court ordered school finance reform on spending disparities How do school districts use money from finance reform What policy options are available to states facing new challenges from court decisions mandating adequacy in school finance When measuring adequacy how do you consider differences in student needs and regional costs
