The Second World War Part 1 Of 2:

The Second World War Tank Crisis Dick Taylor,2021-06-30 British Second World War tanks performed so badly that it is difficult to bring to mind any other British weapon of the period that provokes such a strong sense of failure Unfortunately many of the accusations appear to be true British tanks were in many ways a disgrace But why was Britain the country that invented them consistently unable to field tanks of the required quality or quantity throughout the conflict This perceived failure has taken on the status of a myth but like all myths it should not be accepted at face value it should be questioned and analyzed And that is what Dick Taylor does in this closely researched and absorbing study He looks at the flaws in British financial policy tank doctrine design production and development before and throughout the war years which often had fatal consequences for the crews who were sent to fight and to be murdered in mechanical abortions Their direct experience of the shortcomings of these machines is an important element of the story He also considers how British tanks compared to those of the opposition and contrasts tank production for the army with the production of aircraft for the RAF during the same period His clear sighted account goes on to explain how later in the conflict British tank design improved to the point where their tanks were in many ways superior to those of the Americans and Germans and how they then produced the Centurion which was one of the best main battle tanks of the post war era *Military Effectiveness: Volume 3, The Second World War* Allan R. Millett,Williamson Murray,2010-08-09 This three volume study examines the questions raised by the performance of the military institutions of France Germany Russia the United States Great Britain Japan and Italy in the period from 1914 to 1945 Leading military historians deal with the different national approaches to war and military power at the tactical operational strategic and political levels They form the basis for a fundamental re examination of how military organizations have performed in the first half of the twentieth century Volume 3 covers World War II Volumes 1 and 2 address address World War I and the interwar period respectively Now in a new edition with a new introduction by the editors these classic volumes will remain invaluable for military historians and social scientists in their examination of national security and military issues They will also be essential reading for future military leaders at Staff and War Colleges

British Cultural Memory and the Second World War Lucy Noakes,Juliette Pattinson,2013-11-21 Few historical events have resonated as much in modern British culture as the Second World War It has left a rich legacy in a range of media that continue to attract a wide audience film TV and radio photography and the visual arts journalism and propaganda architecture museums music and literature The enduring presence of the war in the public world is echoed in its ongoing centrality in many personal and family memories with stories of the Second World War being recounted through the generations This collection brings together recent historical work on the cultural memory of the war examining its presence in family stories in popular and material culture and in acts of commemoration in Britain between 1945 and the present

The Role of the Soviet Union in the Second World War Boris Sokolov,2013-04-24 This book investigates several

controversial issues regarding the role of the Soviet Union and the performance of the Soviet government and Red Army to which the author provides some provocative answers. The primary question explored by the author however regards the effectiveness of both the Red Army and of the Soviet military economy. Dr Sokolov argues that the chief defect of the Soviet military economy was the disproportionate emphasis on the production of tanks and aircraft at the expense of transportation means and the means of command and control. This leads the author to look at the role of Lend Lease during the war. Through the delivery of radio sets, trucks, jeeps, locomotives, fuel, explosives, and so on, the author concludes that Lend Lease was critical to the Red Army and that the Soviet Union would not have been able to wage a long war against Germany without the Lend Lease supplies. A conclusion that defies decades of Soviet claims to the contrary. Finally, the author looks at the still very controversial and hot topic of Red Army losses in the war, which was taboo for decades, arguing that this is an effective measure of the Red Army's military performance. He and other scholars have estimated that the Red Army's losses were on the scale of 27 million, three times larger than the official estimates and approximately 10 times greater than the German losses on the Eastern Front. He argues that such horrendous casualties and such an unfavorable ratio for the Red Army were the result of the relatively low value placed on human life in both the Russian Empire and the Soviet Union and the much more destructive nature of the Soviet totalitarian regime as compared with the Third Reich, which cowed the Soviet generals and officers into total subservience. Due to the elimination of all political opposition and the total control over people's lives, soldiers and civilians could not protest against the crude tactics that resulted in such a very high rate of losses.

Dr Boris Sokolov is a prolific author and a member of the Russian branch of PEN International, which celebrates literature and promotes freedom of expression. In 2008, Dr Sokolov was forced to resign as Professor of Social Anthropology from his post at the Russian State Social University in Moscow at the demand of President Medvedev's administration after publishing an article about the 2008 Russian-Georgian War. The author of 69 books as of 2012, his work has focused on the history of the Second World War and has also written biographies of such prominent military and political leaders as Bulgakov, Stalin, Molotov, Beria, Tukhachevsky, Rokossovsky, and Zhukov. In addition, he has written numerous articles on history, philology, political science, and economics. A prominent specialist in the problems of military losses, military economy, and strategy, he has given lectures in Russia, Estonia, Latvia, and Denmark, and his books and articles have been translated into numerous languages. He currently resides in Moscow and is working on a biography of Marshal Rodion Malinovsky.

Stuart Britton is a freelance translator and editor residing in Cedar Rapids, Iowa. He has been responsible for making a growing number of Russian titles available to readers of the English language, consisting primarily of memoirs by Red Army veterans and recent historical research concerning the Eastern Front of the Second World War and Soviet air operations in the Korean War. Notable recent titles include Valeriy Zamulin's award-winning *Demolishing the Myth: The Tank Battle at Prokhorovka, Kursk, July 1943: An Operational Narrative* (Helion, 2011) and Boris Gorbachevsky's *Through the Maelstrom: A Red Army Soldier's War on*

Targeting the Third Reich Robert S. Ehlers, Jr., 2015-04-15 When large formations of Allied four engine bombers finally flew over Europe it marked the beginning of the end for the Third Reich Their relentless hammering of Germany totaling more than 1.4 million missions took out oil refineries industries and transportation infrastructures vital to the Reich's war effort While other accounts have focused on operational details this is the first book to reveal the crucial role of air intelligence in these dramatic campaigns Robert Ehlers reexamines these bombings through the lens of both air intelligence and operations a dual approach that shows how the former was so vital to the latter's success Air intelligence was essential to both targeting and damage assessment and by demonstrating its contributions to the Combined Bomber Offensive of 1943-1945 Ehlers provides a wealth of new insight into the war Ehlers describes the close ties that developed between the Royal Air Force's precision intelligence arm and the U.S. Army Air Force's precision bombardment forces telling how the RAF's photographic reconnaissance and signals intelligence steered both British and American bombers to the right targets at the right intervals with the right munitions He shows that the greatest strength of this partnership was its ability to orchestrate all aspects of damage assessment within an effective organizational structure so that by 1944 senior air commanders like the RAF's Arthur Bomber Harris and the AAF's Carl Tooe Spatz could gauge the accuracy of bombing with a high degree of precision analyze its effects on the German war effort and determine its effectiveness in helping the Allies achieve strategic objectives Ehlers focuses on three key offensives in 1944 against French and Belgian rail supply lines delivering German troops and supplies to Normandy against German oil refineries and against railroads and waterways inside the Reich that had a disastrous effect on the Nazi war effort In the process he underscores the degree to which bombers constituted part of a highly effective combined arms force giving Allied armies crucial advantages on the battlefield Drawing on a huge collection of bomb damage assessment photographs and a wealth of other archival sources he shows that the success of these and other efforts can be traced directly to the success of air intelligence Providing a deeper and more accurate understanding of the bomber campaigns role in the Allied victory Ehlers's study testifies to the strategic importance of these efforts in that war and provides a tool for understanding the importance of intelligence operations in future conflicts
