Why Buildings Fall Down Matthys Levy, 2002 *Collapse* Phillip Wearne, 2000 What happens when the very ground beneath your feet gives way In *Collapse* Philip Wearne tells the stories behind the worst structural engineering disasters of the last fifty years and the forensic engineers who investigated their causes Using expert testimonies from scientific investigators Wearne studies eleven high profile cases of catastrophic structural collapse from The Hyatt Regency Hotel in Kansas City and the Hartford Civic Center in Connecticut to the Alfred P Murrah Federal Building in Oklahoma City Sometimes if these disasters have a single cause it is a small flaw that spawns a chain reaction for instance the miniscule flaw in the metal of one eyebar of the Point Pleasant Bridge on the Ohio River Usually though and more alarmingly the causes are human Mistakes misunderstandings incompetence greed and corruption every facet of human failing is represented in these structural collapses This makes the investigation of these failures by agencies like the Failure Analysis Associates who can have close to two thousand investigations ongoing at any one time dirty and dangerous business Wearne s case study takes us deep inside the ever growing industry of forensic engineering revealing a group of professionals dedicated to determining the cause of a collapse at any cost while learning and applying valuable lessons from each failure Provocative and well written *Collapse* is essential for deepening our understanding of and readiness for catastrophe
