Why Mothers Kill Geoffrey R. McKee, 2015 This title uses more than a dozen case studies to help us understand and most importantly prevent crimes where a mother murders her child It applies current research findings to analyse explain and suggest practical interventions to alter the personal familial and situational circumstances that may influence some mothers to kill With an emphasis on prevention it sets out specific strategies that might have been employed at various risk intervention points occurring before the child s death Through the use of extended narratives the resource brings to life the thoughts and emotions experienced by women in each of the five categories of mothers the author has identified from his years of practice

When Mothers Kill Cheryl L. Meyer, Michelle Oberman, 2008-06-01 Winner of the 2008 Outstanding Book Award by the Academy of Criminal Justice Sciences Michelle Oberman and Cheryl L Meyer don t write for news magazines or prime time investigative television shows but the stories they tell hold the same fascination *When Mothers Kill* is compelling In a clear direct fashion the authors recount what they have learned from interviewing women imprisoned for killing their children Readers will be shocked and outraged as much by the violence the women have endured in their own lives as by the violence they engaged in but they will also be informed and even enlightened Oberman and Meyer are leading authorities on their subject Their 2001 book *Mothers Who Kill Their Children* drew from hundreds of newspaper articles as well as from medical and social science journals to propose a comprehensive typology of maternal filicide In that same year driven by a desire to test their typology and to better understand child killing women not just as types but as individuals Oberman and Meyer began interviewing women who had been incarcerated for the crime After conducting lengthy face to face interviews with forty prison inmates they returned and selected eight women to speak with at even greater length This new book begins with these stories recounted in the matter of fact words of the inmates themselves There are collective themes that emerge from these individual accounts including histories of relentless interpersonal violence troubled relationships with parents particularly with mothers twisted notions of romantic love and deep conflicts about motherhood These themes structure the books overall narrative which also includes an insightful examination of the social and institutional systems that have failed these women Neither the mothers nor the authors offer these stories as excuses for these crimes

Women and Feminism , 2007 *Abortion Counseling* Rachel B. Needle, Lenore Walker, EdD, 2008 The majority of women who have had abortions report feeling happy satisfied and relieved following their abortion Some few women who have had an abortion may experience some feelings of guilt and sadness however this rarely lasts longer than a few days Those very few women who present with prolonged feelings of sadness and mental health problems are women who have either had these problems prior to their abortion had other risk factors or were influenced by frightening demonstrations and inaccurate biased information provided prior to the abortion Through this book the authors hope to train general therapists and counselors in pre and post abortion counseling techniques to avoid women experiencing unnecessary psychological problems created by those who insist that the non existent post abortion syndrome exists Abortion counseling has a critical role to play in ensuring women s mental health is the priority and not the goals of a political agenda Thus Needle and Walker have taken on a complex profound and essential task equipping therapists and abortion counselors with the knowledge and skills needed to help their clients and they have done it well Readers of this book should gain an increased understanding of how women s diverse life circumstances affect their ability to cope with the difficult decisions and circumstances surrounding abortion They will also be better able to build women s resilience and coping skills by having considered them both in the context of

women's lives e.g. coping resources social support partner violence incidence of depression and in the context of socio-political agendas that seek to manipulate women's mental health in order to undermine women's reproductive rights In the final analysis it is important to remember that abortion counseling is not about abortion it is about women confronting the decision to bear a child with all of the profound and life-changing commitments and responsibilities that entails From the Foreword by Nancy Felipe Russo PhD Regents Professor of Psychology Arizona State University [American Book Publishing Record](#), 2006 *Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur*, 2007 *Kaapse bibliotekaris*, 2005 Issues for Nov 1957 include section Accessions Aanwinste Sept 1957 **Infanticide and Filicide** Gina Wong, Ph.D., George Parnham, J.D., 2020-12-09 Maternal filicide the killing of a child by the mother is not a new phenomenon Evidence of mothers killing their infants dates back to at least 2000 B.C.E and the ancient Chaldean civilization The trial of Andrea Yates in 2001 for drowning her five children however captured the public attention in a way few similar cases had before Initially met with public shock and outrage the Yates case also spotlighted postpartum psychosis and maternal mental health forensics the intersection of maternal mental illness and the criminal justice system Coedited by George Parnham the attorney who successfully defended Yates this book includes his narrative account of how he first heard about and came to take on the case It also features real case examples from more than 30 experts in the field representing eight countries In addition the book includes a chapter on paternal filicide an important subject that receives far too little attention in the literature Firmly rooted in research thorough in its description of theory and packed with practical applications this volume highlights the necessary competency areas for those involved in maternal mental health forensics whether psychologists psychiatrists social workers or lawyers **Who's who in the West**, 1987 *Women Who Kill* Lenore Walker, David Shapiro, Amanda Temares, Brandi Diaz, 2024-10-11 Women rarely kill How and why a woman can be driven to lethal action is often highly complex and misunderstood Many of these women who act lethally are driven to such a point as a last resort following prolonged experiences of child abuse and or domestic violence This book offers insights into these women detailing their motivations their patterns of violence and how they can be aided through psychological evaluation and proper expert testimony The chapters in this volume also include discussions of women who did not kill but were punished as if they had This collection of writings seeks to fill the gaps in research on women who kill This book is beneficial to students and researchers of Psychology including Forensic Psychology It will further aid the field of criminal justice as well as policymakers such that clinicians can provide an enhanced understanding on various psychological and demographic factors which contribute to situations where battered women reach a point where the only option to ensure survival is lethal self-defense Finally this book offers clarity as it points out the areas in which the legal system has failed these women The chapters in this book were originally published as a special issue of *Journal of Aggression Maltreatment Trauma* **Killer Moms: Shocking Cases of Women Who Killed Their Children** Patrick Thongchanh, 2021-05-27 Mothers killing their own

children is shockingly more common than you think so much so that there's even a term for the killer moms who do it: filicide. Although people might wonder in confusion as to how a parent can take away the life of the one thing they are supposed to love and protect, psychologists say there are several reasons for why moms choose to kill, from spousal revenge to altruistic motives. In this book, you'll learn about sixteen of the most terrible cases of moms who killed their own children. You'll learn about little-known details of some high-profile killer mom cases, such as Casey Anthony and Andrea Yates, and a few that are little-known. You'll read about moms who killed their children for profit and others who did so because they were tired of them. There are also a few cases profiled in this book that just defy explanation and appear to have been driven by no motive other than insanity. So sit back, relax, and open the pages of this book to learn about sixteen of the most dastardly mothers in American history. You will be disturbed, but at the same time, you won't be able to stop reading.

A Love That Kills Anna Motz, 2023-03-02. An empathetic and necessary corrective to the stereotypes peddled by so many sensational true crime shows. Oprah Daily. Anna Motz is one of the most internationally acclaimed forensic psychotherapists at work today. For more than three decades, she has treated women imprisoned for violent crimes. With candor, compassion, insight, and a clear-eyed perspective, Anna introduces us to eleven ordinary women who came to commit extraordinary acts, examining the fault lines that led to their crimes and the sometimes perilous journey both therapist and patient take towards recovery.

Psychological DNA John C. Brady, 2024-06-05. Uncover the truth behind a political tragedy. Psychological DNA: A Cold Case Analysis of Who Killed Robert F. Kennedy re-examines the assassination of RFK through a modern criminological lens. Delve into the mind of Sirhan Sirhan, the convicted assassin, as Dr. John C. Brady II, a licensed forensic psychologist, dissects his fractured mental state. Was Sirhan a lone gunman or a pawn in a larger conspiracy? This book explores the psychological factors driving Sirhan's actions, the validity of the diminished capacity defense, newly constructed criminal and mental destabilizers, and discovers a comprehensive new mental picture of a killer and a fateful moment in American history. Perfect for true crime aficionados and those interested in forensic psychology.

Infanticide Margaret G. Spinelli, 2008-08-13. Maternal infanticide or the murder of a child in its first year of life by its mother elicits sorrow, anger, horror, and outrage. But the perpetrator is often a victim, too. The editor of this revealing work asks us to reach beyond rage, stretch the limits of compassion, and enter the minds of mothers who kill their babies with the hope that advancing the knowledge base and stimulating inquiry in this neglected area of maternal infant research will save young lives. Written to help remedy today's dearth of up-to-date research-based literature, this unique volume brings together a multidisciplinary group of 17 experts: scholars, clinicians, researchers, clinical and forensic psychiatrists, pediatric psychoanalysts, attorneys, and an epidemiologist who focus on the psychiatric perspective of this tragic cause of infant death. This comprehensive practical work is organized into four parts for easy reference. Part I presents historical and epidemiological data, including a compelling discussion of the contrasting legal views of infanticide in the United States, United Kingdom, and other Western countries, a review of the latest

statistics on maternal infanticide and a discussion of the problems of underreporting and the lack of available documentation Part II covers the psychiatric psychological cultural and biological underpinnings of infanticide detailing how to identify evaluate and treat postpartum psychiatric disorders The authors explore clinical diagnosis symptom recognition risk factors biological precipitants and alternative motives such as cultural infanticide Chapter 3 developed to assist the attorney or mental health professional in understanding the implications of postpartum psychiatric illness as they relate to infanticide presents a sensitive and thorough inquiry into infanticidal ideation Part III focuses on contemporary legislation criminal defenses and disparate treatment in U S law and compares U S law with the U K s model of probation and treatment Chapter 8 is an especially useful resource for the attorney or expert psychiatric witness preparing for an infanticide neonaticide case in the criminal court system Part IV discusses clinical experience with mothers as perpetrators and countertransference in therapy the range of mother infant interactions from healthy to pathological and methods of early intervention and prevention This balanced perspective on a highly emotional issue will find a wide audience among psychiatric and medical professionals child clinical and forensic psychiatrists and psychologists social workers obstetricians gynecologists and midwives nurses and pediatricians legal professionals judges attorneys law students public health professionals and interested laypersons

Mothers Who Murder Xanthe Mallett, 2014-10-10 All of these women are notorious but are all of them deadly Child murder A social taboo and one of the most abhorrent acts most of us can imagine Meet the women found guilty of murdering their own children They represent some of the most hated women
