Why Us A Common Sense Guide For The Childless:

Why Us? Andrew Stanway,1980-01-01 Childless: No Choice James H. Monach,2003-09-02 As many as one in five couples in some population groups might be involuntarily childless and despite the attention attracted by technological advances and media coverage people often feel themselves to be totally isolated stigmatised and misunderstood by many professionals and ordinary people Childless No Choice is based on original research into the emotional and social aspects of involuntary childlessness the main component being a long term study of the experiences of couples attending an infertility clinic supported by a community survey and a study of the attitudes of general practitioners At a time of rapidly developing treatments for infertility and new legislative controls it is important that all those professionally involved have a full appreciation of the experiences and views of infertile people themselves While there is enormous attention in the media given to getting pregnant and to childbirth there is an almost total neglect of the possibility that for some people these natural functions may not happen James H Monach examines in detail the causes of childlessness and the availability of choices for childless people including artificial insemination fostering and adoption This book will be invaluable to doctors sociologists social workers psychologists health administrators and to anyone who works with childless couples as well as to childless couples themselves

Family Adrian Wilson,2002-08-26 Adrian Wilson provides a comprehensive introduction to the study of the family The book opens with a chapter on family structure looking at the family historically and in cross cultural perspective Following this is a review first of theoretical approaches to the family including functionalist feminist Marxist and radical criticism and second how the family is studied sociologically Chapters 4 and 5 look at the changing British family and British families today and the concluding chapters examine family problems for example divorce violence one parent families and the family and the state

Health Psychology Annabel Broome,2013-11-11 ANNABEL K BROOME The importance of psychological processes in the experience of health and sickness is being increasingly recognized There is mounting evidence for the role of personal behaviour in current trends of morbidity and mortality which is reflected in rapid and significant developments in psychological research Patterns of illness and death have changed in recent years with concurrent changes in demands on health services the skills of carers and the adjustments of the sick person It is within this changing scene that clinical and health psychologists are becoming increasingly involved in applied research into the prevention or alleviation of current health problems These changes are also influencing the training of health professionals with behavioural sciences now forming a substantial component of basic curricula in medical schools and other areas of professional training This book has arisen from this changing clinical scene and the need to convey useful psychological principles to care givers Part One concentrates on the general psychological processes that have relevance in many health settings in the prevention alleviation and management of illness as well as current practices in health care delivery As these developments have been patchy Part Two focuses on selected specialties that have received attention This book is not a comprehensive review of work

done in all medical specialties although the structure has been chosen to reflect the prevalent sub divisions of medical teamwork *Nursing Times, Nursing Mirror* ,1998 *Psychology and Gynaecological Problems* Annabel Broome,Louise Wallace,1984 **Shelfmark : Bulletin of the National Free Library of Zimbabwe** ,1982 **LRC** ,1988 **Die Kaapse bibliotekaris** ,1985 Issues for Nov 1957 include section Accessions Aanwinste Sept 1957 also published separately **Whitaker's Cumulative Book List** ,1986 **Babies Made in Glass** Daniel Ch Overduin,Daniel Christiaan Overduin,1986 **Whitaker's Books of the Month & Books to Come** ,1986 **The Cosmos of Duty** Roger Crisp,2015 Roger Crisp presents a comprehensive study of Henry Sidgwick s *The Methods of Ethics* a landmark work first published in 1874 Crisp argues that Sidgwick is largely right about many central issues in moral philosophy the metaphysics and epistemology of ethics consequentialism hedonism about well being and the weight to be given to self interest He holds that Sidgwick s long discussion of common sense morality is probably the best discussion of deontology we have And yet *The Methods of Ethics* can be hard to understand and this is perhaps one reason why though it is a philosophical goldmine few have ventured deeply into it What does Sidgwick mean by a method Why does he discuss only three methods What are his arguments for hedonism and for utilitarianism How can we make sense of the idea of moral intuition What is the role of virtue in Sidgwick s ethics Crisp addresses these and many other questions offering a fresh view of Sidgwick s text which will assist any moral philosopher to gain more from it **The British Library General Catalogue of Printed Books, 1986 to 1987** British Library,1988 **Spare Rib** ,1981-07 The British National Bibliography Arthur James Wells,1979 British Books in Print ,1979 *The Point of View of the Universe* Katarzyna de Lazari-Radek,Peter Singer,2014 Tests the views and metaphor of 19th century utilitarian philosopher Henry Sidgwick against a variety of contemporary views on ethics determining that they are defensible and thus providing a defense of objectivism in ethics and of hedonistic utilitarianism **Farmers' Guide** ,1901 *Common Sense* ,1904
