of each chapter is the notion that the world of work and employment relations has changed substantially since the halcyon days of IR throughout the Dunlop Era of the 1950s. However, many areas of enquiry remain and more questions have developed with society and technology. This Handbook reflects this view. An extraordinary confluence of forces stemming from automation and digital technologies is transforming both the world of work and the ways we educate current and future employees to contribute productively to the workplace. The Great Skills Gap opens with the premise that the exploding scope and pace of technological innovation in the digital age is fast transforming the fundamental nature of work.
