Trending Renewable Energy:

Trends in Renewable Energies Offshore C. Guedes Soares, 2022-11-02 Renewable energy resources offshore are a growing contributor to the total energy production in a growing number of countries. As a result, the interest in the topic is increasing. Trends in Renewable Energies Offshore includes the papers presented at the 5th International Conference on Renewable Energies Offshore RENEW 2022 Lisbon Portugal 8-10 November 2022 and covers recent developments and experiences gained in concept development, design, and operation of such devices. The scope of the contributions is broad, covering all aspects of renewable energies offshore activities, including Resource assessment, Tidal Energy, Wave Energy, Wind Energy, Solar Energy, Renewable Energy Devices, Multiuse Platforms, Maintenance planning, Materials, and structural design. Trends in Renewable Energies Offshore will be of interest to academics and professionals involved or interested in applications of renewable energy resources offshore. The Proceedings in Marine Technology and Ocean Engineering series is dedicated to the publication of proceedings of peer-reviewed international conferences dealing with various aspects of Marine Technology and Ocean Engineering. The Series includes the proceedings of the following conferences: the International Maritime Association of the Mediterranean (IMAM) conferences, the Marine Structures (MARSTRUCT) conferences, the Renewable Energies Offshore (RENEW) conferences, and the Maritime Technology (MARTECH) conferences. The Marine Technology and Ocean Engineering series is also open to new conferences that cover topics on the sustainable exploration and exploitation of marine resources in various fields, such as maritime transport and ports usage of the ocean, including coastal areas, nautical activities, the exploration and exploitation of mineral resources, the protection of the marine environment, and its resources, and risk analysis, safety, and reliability. The aim of the series is to stimulate advanced education and training through the wide dissemination of the results of scientific research.

Recent Trends in Intensive Computing M. Rajesh, K. Vengatesan, M. Gnanasekar, S. Sitharthan, R.A.B. Pawar, P.N. Kalvadekar, P. Saiprasad, 2021-12-15 In a world where computer science is now an essential element in all of our lives, a new opportunity to disseminate the latest research and trends is always welcome. This book presents the proceedings of the first International Conference on Recent Trends in Computing (ICRTC 2021) which was held as a virtual event on 21-22 May 2021 at Sanjivani College of Engineering, Kopergaon, India, due to the restrictions of the COVID-19 pandemic. This online conference aimed at facilitating academic exchange among researchers, enabled experts and scholars around the globe to gather for the discussion of the latest advanced research in the field despite the extensive travel restrictions still in place. The book contains 134 papers selected from 329 submitted papers after a rigorous peer review process, and topics covered include advanced computing, networking, informatics, security, and privacy, and other related fields. The book will be of interest to all those eager to find the latest trends and most recent developments in computer science.

Mariprasath, V. Kirubakaran, 2019-11 Renewable energy sources are currently a particularly pressing need as we all have become addicted to the usage of electrical energy The extraction of fossil fuels has to be reduced as they are depleting at an ever increasing rate which is due to the increase in population and the subsequent rapid urbanization As a consequence research into both power saving electrical appliances and feasible energy sources is ongoing Thus it is necessary that future energy sources should be reliable renewable and eco friendly This book includes discussion about renewable energy resources like wind and solar power plants and a comparison between renewable and non renewable energy sources with valid data from various case studies In addition the impact of fossil fuelled power plants on the environment is discussed and real time datum from the energy audit of solar power plant are given The advantages of renewable resources over conventional ones are also explored in detail **Recent Trends in the Law and Policy of Bioenergy Production, Promotion and Use** Charlotta Jull, 2007 In recent years there has been increasing recognition of the need for sound regulatory frameworks for bioenergy Faced with high petroleum and natural gas prices and increasingly aware of climate

change and environmental concerns many countries are implementing national policies and legislation to encourage bioenergy production and use These developments stem from the desire to achieve energy security and self sufficiency the need to reduce reliance on foreign fossil fuel reserves and the hope of providing increased trade opportunities for some agricultural commodities Land use and the competing needs of energy and food security are key issues in the bioenergy debate International and national regulatory frameworks will have to establish clear guidelines for the sustainable development of the bioenergy industry This paper aims to stimulate discussion on the elements of appropriate national legal frameworks for bioenergy particularly in developing countries It provides legislators and policy makers with a tool to assist in identifying areas of law which may affect bioenergy regulation and in designing key elements of national bioenergy laws
