

Abstract

Environmental factors determine the suitability of natural habitats for crop pests and often influence their proliferation and that of the crop diseases they carry. Crop pests and diseases damage food crops, significantly reducing yields for these commodities and threatening food security in developing, predominantly agricultural economies. Given its impact on environmental factors, climate change is an important determinant of crop pest and disease distribution. This study uses bioclimatic tools, a climate suitability analysis and mapping model, to explore the potential impact of climate change on seven environmental factors linked to crop pest and associated diseases proliferation. Based on the existing literature, predictor modeling was performed on 27 key pests and diseases that impact the major food crops for Zambian consumption. Future changes in habitat suitability for these crop pests and diseases were mapped based on their optimal temperature and relative humidity conditions for proliferation. Results project that there will be an overall increased geographical spread of suitable habitats for crop pests (and as follows, crop diseases) that thrive in warmer environments. By the 2050s, crop pests and diseases will increasingly spread across Zambia, with a higher likelihood of occurrence projected under RCPs 2.6, 4.5, and 8.5. Crop pests and diseases that thrive in cooler environments will experience decreasing habitat suitability in the 2050s, but will transition to a slower decrease in the 2080s under RCPs 2.6 and 4.5. Overall crop pest and disease habitat suitability will continue to rise slowly in the 2050s, RCP 8.5 shows an increased habitat suitability for crop pests and diseases that thrive in warm environments, with a decreased likelihood of occurrence for crop pests and diseases that thrive in cooler environments. The results highlight the need for future-facing, long-term climate adaptation and mitigation measures that create less suitable microclimates for crop pests and diseases.

Why Abstract

Krešimir Purgar

Why Abstract:

Why Abstract? Hilaire Hiler, Henry Miller, William Saroyan, 1945

The Iconology of Abstraction Krešimir Purgar, 2020-06-15 This book uncovers how we make meaning of abstraction both historically and in present times and examines abstract images as a visual language The contributors demonstrate that abstraction is not primarily an artistic phenomenon but rather arises from human beings desire to imagine understand and communicate complex ineffable concepts in fields ranging from fine art and philosophy to technologies of data visualization from cartography and medicine to astronomy The book will be of interest to scholars working in image studies visual studies art history philosophy and aesthetics

The Psychology of Word Meanings Paula J. Schwanenflugel, 2013-06-17 This volume contains perspectives from a collection of cognitive scientists on the psychological philosophical and educational issues surrounding the meanings of words and how these meanings are learned and accessed It features chapters covering the nature and structure of word meaning how new word meanings are acquired in childhood and later on in life and how research in word processing may tell us something about the way in which word meanings are represented and how they relate to the language processor

Aquaculture International April 2009 **Writing Scientific Research Articles Strategy and Steps** guides authors in how to write as well as what to write to improve their chances of having their articles accepted for publication in international peer reviewed journals The book is designed for scientists who use English as a first or an additional language for research students and those who teach them paper writing skills and for early career researchers wanting to hone their skills as authors and mentors It provides clear processes for selecting target journals and writing each

section of a manuscript starting with the results The stepwise learning process uses practical exercises to develop writing and data presentation skills through analysis of well written example papers Strategies are presented for responding to referee comments as well as ideas for developing discipline specific English language skills for manuscript writing The book is designed for use by individuals or in a class setting Visit the companion site at www.writeresearch.com.au for more information

Reductionism in Art and Brain Science Eric R. Kandel, 2016-08-30 Are art and science separated by an unbridgeable divide Can they find common ground In this new book neuroscientist Eric R Kandel whose remarkable scientific career and deep interest in art give him a unique perspective demonstrates how science can inform the way we experience a work of art and seek to understand its meaning Kandel illustrates how reductionism the distillation of larger scientific or aesthetic concepts into smaller more tractable components has been used by scientists and artists alike to pursue their respective truths He draws on his Nobel Prize winning work revealing the neurobiological underpinnings of learning and memory in sea slugs to shed light on the complex workings of the mental processes of higher animals In Reductionism in Art and Brain Science Kandel shows how this radically reductionist approach applied to the most complex puzzle of our time the brain has been employed by modern artists who distill their subjective world into color form and light Kandel demonstrates through bottom up sensory and top down cognitive functions how science can explore the complexities of human perception and help us to perceive appreciate and understand great works of art At the heart of the book is an elegant elucidation of the contribution of reductionism to the evolution of modern art and its role in a monumental shift in artistic perspective Reductionism steered the transition from figurative art to the first explorations of abstract art reflected in the works of Turner Monet Kandinsky Schoenberg and Mondrian Kandel explains how in the postwar era Pollock de Kooning Rothko Louis Turrell and Flavin used a reductionist approach to arrive at their abstract expressionism and how Katz Warhol Close and Sandback built upon the advances of the New York School to reimagine figurative and minimal art Featuring captivating drawings of the brain alongside full color reproductions of modern art masterpieces this book draws out the common concerns of science and art and how they illuminate each other
