Why Japan Was Strong:

Why Japan was Strong John Patric,1944 **Welfare and Capitalism in Postwar Japan** Margarita

Estevez-Abe,2008-07-21 This book explains how postwar Japan managed to achieve a highly egalitarian form of capitalism despite meager social spending Estevez Abe develops an institutional rational choice model to solve this puzzle She shows how Japan s electoral system generated incentives that led political actors to protect various groups that lost out in market competition She explains how Japan s postwar welfare state relied upon various alternatives to orthodox social spending programs The initial postwar success of Japan s political economy has given way to periods of crisis and reform This book follows this story up to the present day Estevez Abe shows how the current electoral system renders obsolete the old form of social protection She argues that institutionally Japan now resembles Britain and predicts that Japan s welfare system will also come to resemble Britain s Japan thus faces a more market oriented society and less equality *Why Japan Can't*

Reform S. Carpenter,2008-10-09 An examination of the elements explicit to the Japanese post war governing system that enable the national ministries to extend their administrative authority over the political economy It argues that the insular model defies structural reform and prevents the implementation of economic and social policies that can resolve socio

economic problems **The Secret of the East** Oliver Huckel,1924 **Economic Interdependence and War** Dale C. Copeland,2014-11-02 Does growing economic interdependence among great powers increase or decrease the chance of conflict and war Liberals argue that the benefits of trade give states an incentive to stay peaceful Realists contend that trade compels states to struggle for vital raw materials and markets Moving beyond the stale liberal realist debate Economic Interdependence and War lays out a dynamic theory of expectations that shows under what specific conditions interstate commerce will reduce or heighten the risk of conflict between nations Taking a broad look at cases spanning two centuries from the Napoleonic and Crimean wars to the more recent Cold War crises Dale Copeland demonstrates that when leaders have positive expectations of the future trade environment they want to remain at peace in order to secure the economic benefits that enhance long term power When however these expectations turn negative leaders are likely to fear a loss of access to raw materials and markets giving them more incentive to initiate crises to protect their commercial interests The theory of trade expectations holds important implications for the understanding of Sino American relations since 1985 and for the direction these relations will likely take over the next two decades Economic Interdependence and War offers sweeping new insights into historical and contemporary global politics and the actual nature of democratic versus economic peace **Lafcadio Hearn: Japan's Great Interpreter** Louis Allen,Jean Wilson,2020-07-09 Extensive collection of excerpts exploring the psychological spiritual supernatural social aspects of Japan Including Lafcadio Hearn s Farewell and letters

Commemorative Spaces of the First World War James Wallis, David C. Harvey, 2017-07-20 This is the first book to bring together an interdisciplinary theoretically engaged and global perspective on the First World War through the lens of historical and cultural geography Reflecting the centennial interest in the conflict the collection explores the relationships between warfare and space and pays particular attention to how commemoration is connected to spatial elements of national identity and processes of heritage and belonging Venturing beyond military history and memory studies contributors explore conceptual contributions of geography to analyse the First World War as well as reflecting upon the imperative for an academic discussion on the War s centenary This book explores the War s impact in more unexpected theatres blurring the boundary between home and fighting fronts investigating the experiences of the war amongst civilians and often overlooked combatants It also critically examines the politics of hindsight in the post war period and offers an historical geographical account of how the First World War has been memorialised within official spaces in addition to those overlooked and often undervalued alternative spaces of commemoration This innovative and timely text will be key reading for students and scholars of the First World War and more broadly in historical and cultural geography social and cultural history European history Heritage Studies military history and memory studies

Asian Population History Ts'ui-jung Liu, James Lee, David Sven Reher, Osamu Saito, Wang Feng, 2001-05-10 The study of Asian historical

demography has lagged behind that of its European and American counterparts for some time This volume serves to narrow the gap by drawing together material from scholars specializing in demography across the spectrum of Asian countries The collection divides into four parts and contains nineteen chapters covering issues on comparative perspective fertility disease and mortality and marriage and family The geographic coverage of the chapters is also wide extending from East Asia to South Asia with specific emphasis on Japan China Taiwan Indonesia India and Sri Lanka Authors focus on a whole range of social groups discussing how demographic issues affect and have affected both urban and rural dwellers from the seventeenth to the twentieth century This volume which is perhaps the first to bring together a number of in depth specialist studies on Asian population history should prove a useful and engaging tool for both students and academics in the fields of demography history and Asian studies
