**Why the South Will Survive** Clyde N. Wilson, 2011-09 Examining many aspects of the South religion manners family life localism literature politics rural life and urbanization these essays acknowledge the power and relevance of the Agrarian tradition and argue that the South can still provide a model and touchstone for the nation *The New South, 1945-1980*

Numan V. Bartley, 1995 First published in 1955 to wide acclaim T Harry Williams P G T Beauregard is universally regarded as the first authoritative portrait of the Confederacy's always dramatic often perplexing general Chicago Tribune Chivalric arrogant and of exotic Creole Louisiana origin Beauregard participated in every phase of the Civil War from its beginning to its end He rigidly adhered to principles of war derived from his studies of Jomini and Napoleon and yet many of his battle plans were rejected by his superiors who regarded him as excitable unreliable and contentious After the war Beauregard was almost the only prominent Confederate general who adapted successfully to the New South running railroads and later supervising the notorious Louisiana Lottery This paradox of a man who fought gallantly to defend the Old South and then helped industrialize it is the fascinating subject of Williams superb biography *Neo-Confederacy* Euan Hague, Heidi Beirich, Edward H. Sebesta, 2009-09-15 A century and a half after the conclusion of the Civil War the legacy of the Confederate States of America continues to influence national politics in profound ways Drawing on magazines such as Southern Partisan and publications from the secessionist organization League of the South as well as DixieNet and additional newsletters and websites Neo Confederacy probes the veneer of this movement to reveal goals far more extensive than a mere celebration of ancestry Incorporating groundbreaking essays on the Neo Confederacy movement this eye opening work encompasses such topics as literature and music the ethnic and cultural claims of white Anglo Celtic southerners gender and sexuality the origins and development of the movement and its tenets and ultimately its nationalization into a far reaching factor in reactionary conservative politics The first book length study of this powerful sociological phenomenon Neo Confederacy raises crucial questions about the mainstreaming of an ideology that founded on notions of white supremacy has made curiously strong inroads throughout the realms of sexist homophobic anti immigrant and often orthodox Christian populations that would otherwise have no affiliation with the regionality or heritage traditionally associated with Confederate history

**Stewards of History: A Study of the Nature of a Moral Deed , Neoliberalism and Race** Lars Cornelissen, 2025-10-14 Lars Cornelissen argues that the category of race constitutes an organizing principle of neoliberal ideology Using the methods of intellectual history and drawing on insights from critical race studies Cornelissen explores the various racial constructs that structure neoliberal ideology some of which are explicit while others are more coded Beginning in the interwar period and running through to recent developments Neoliberalism and Race shows that racial themes have always pervaded neoliberal thinking The book's key argument is that neoliberal thought is constitutively racialized its racial motifs cannot be extracted from neoliberalism without rendering it theoretically and politically incoherent The book aptly

explores a wide variety of racial constructs through the structure of neoliberal ideology deconstructing the conceptualizations in the works of landmark thinkers such as Ludwig von Mises Friedrich Hayek Peter Bauer Thomas Sowell Charles Murray and others from the early twentieth century to the present In this original perhaps controversial critique Cornelissen asserts that neoliberal thinkers were not just the passive recipients of racial discourse but also directly impacted it

*The Southern Workman*, 1905 The May or June issue of 1900 1939 includes the report of the institute's president for 1900 1939

*Signs and Cities* Madhu Dubey, 2007-11-01 Signs and Cities is the first book to consider what it means to speak of a postmodern moment in African American literature Dubey argues that for African American studies postmodernity best names a period beginning in the early 1970s marked by acute disenchantment with the promises of urban modernity and of print literacy Dubey shows how black novelists from the last three decades have reconsidered the modern urban legacy and thus articulated a distinctly African American strain of postmodernism She argues that novelists such as Octavia Butler Samuel Delany Toni Morrison Gloria Naylor Ishmael Reed Sapphire and John Edgar Wideman probe the disillusionment of urban modernity through repeated recourse to tropes of the book and scenes of reading and writing Ultimately she demonstrates that these writers view the book with profound ambivalence construing it as an urban medium that cannot recapture the face to face communities assumed by oral and folk forms of expression
