**PLATE: Product Lifetimes And The Environment** Conny A. Bakker, 2017-11-15. Product lifetimes are critical for the circular economy, resource efficiency, waste reduction, and low-carbon strategies for sustainability and are therefore of interest to academics from many different disciplines, as well as original equipment manufacturers (OEMs) and other stakeholders. The challenges related to product lifetimes must be tackled from multiple perspectives, making the sharing of knowledge and expertise from different disciplines particularly important. This book presents papers from the second Product Lifetime and the Environment (PLATE) conference held in Delft, the Netherlands, in November 2017. The conference originated from the desire to bring together academic researchers working in the field of sustainability to benefit from each other's knowledge and further advance the field. The book includes the 88 full papers delivered at the conference, grouped according to the following 7 conference themes: design for product longevity, product lifetime optimization, cultural perspectives on the throwaway society, circular economy and product lifetimes, business opportunities, economic implications, and marketing strategies, consumer influences on product lifetimes, and policy regulation and legislation. The book will be of interest to all those concerned with sustainable consumption, circular economy, and resource efficiency.
