**Time Pressure and Stress in Human Judgment and Decision Making** Ola Svenson, A.J. Maule, 1993-11-30 The current volume makes an important contribution to an underexplored field by integrating research into the effects of stress associated with time constraints on individual judgment Unique and comprehensive the book reviews knowledge from a variety of disciplines critically examines the theories methodologies and data of time pressure research and suggests priorities for future research *Time Pressure and Stress in Human Judgment and Decision Making* A.J. Maule, O. Svenson, 2013-03-09 Some years ago we the editors of this volume found out about each other's deeply rooted interest in the concept of time the usage of time and the effects of shortage of time on human thought and behavior Since then we have fostered the idea of bringing together different perspectives in this area We are now therefore very content that our idea has materialized in the present volume There is both anecdotal and empirical evidence to suggest that time constraints may affect behavior Managers and other professional decision makers frequently identify time pressure as a major constraint on their behavior Isenberg 1984 Chamberlain and Zika 1990 provide empirical support for this view showing that complaints of insufficient time are the most frequently reported everyday minor stressors or hassles for all groups of people except the elderly Similarly studies in occupational settings have identified time pressure as one of the central components of workload Derrich 1988 O'Donnell Eggemeier 1986 *Simple Heuristics that Make Us Smart* Gerd Gigerenzer, Peter M. Todd, ABC Research Group, 2000-10-12 *Simple Heuristics That Make Us Smart* invites readers to embark on a new journey into a land of rationality that differs from the familiar territory of cognitive science and economics Traditional views of rationality tend to see decision makers as possessing superhuman powers of reason limitless knowledge and all of eternity in which to ponder choices To understand decisions in the real world we need a different more psychologically plausible notion of rationality and this book provides it It is about fast and frugal heuristics simple rules for making decisions when time is pressing and deep thought an unaffordable luxury These heuristics can enable both living organisms and artificial systems to make smart choices classifications and predictions by employing bounded rationality But when and how can such fast and frugal heuristics work Can judgments based simply on one good reason be as accurate as those based on many reasons Could less knowledge even lead to systematically better predictions than more knowledge *Simple Heuristics* explores these questions developing computational models of heuristics and testing them through experiments and analyses It shows how fast and frugal heuristics can produce adaptive decisions in situations as varied as choosing a mate dividing resources among offspring predicting high school drop out rates and playing the stock market As an interdisciplinary work that is both useful and engaging this book will appeal to a wide audience It is ideal for researchers in cognitive psychology evolutionary psychology and cognitive science as well as in economics and artificial intelligence It will also inspire anyone interested in simply making good decisions *When Leadership Goes Wrong Destructive Leadership, Mistakes, and Ethical Failures*

Birgit Schyns, Tiffany Hansbrough, 2010-07-08 The book explores the darker side of leadership broadening the scope of leadership studies by acknowledging that leaders can cause harm It includes contributions from scholars on topics like narcissistic and destructive leadership ethical leadership and leader errors enhancing practical implications of leadership research
