Toolkit Nutrition Guide

Corri Wolf

A decorative graphic element consisting of a light blue horizontal bar with a rounded right end, and a red circular glow behind it.

Toolkit Nutrition Guide:

A toolkit for incorporating fish into the home-grown school feeding programme Andrianarimanana M., Ahern M., Toppe J., Polo Galante A., 2024-06-13 Food and nutrition security is one of the 17 Sustainable Development Goals enshrined in the 2030 Agenda for Sustainable Development. In an attempt to contribute to reaching this objective, school feeding programmes are serving meals to over 418 million pre-primary, primary and secondary schoolchildren around the world. The positive experience from a project supported by the Food and Agriculture Organization of the United Nations (FAO) in Angola, Honduras and Peru that incorporated locally procured fish into home-grown school feeding (HGSF) programmes led to the elaboration of this toolkit. This toolkit is designed to support governments, project designers, managers and practitioners involved in the fishery value chain and school feeding who want to incorporate locally procured, safe, nutritious and affordable fish and fish products into their existing HGSFs. Therefore, this toolkit is expected to assist them during the rapid assessment of the situation of the school feeding and fishery sector and the identification of challenges and opportunities present while incorporating fish and fish products into HGSFs. To this end, this toolkit adopts three main approaches: the Sustainable Food Value Chain for Nutrition to enhance the consideration of nutrition lens in the value chain approach, the gender transformative approach to support women fisherfolk in their activities and increase their participation in school feeding programmes, and local and inclusive food procurement to connect public demand for food to small-scale fisherfolk. Specifically, this toolkit proposes 4 phases and 15 flexible and adaptable tools to sustainably serve fish and fish products at schools.

An Interprofessional Approach to Veterinary Nutrition Rachel Lumbis, Tierney Kinnison, 2023-05-31 In veterinary practice, the interface between veterinarians, veterinary nurses or technicians and paraprofessional team members is crucial. It influences patient care, incidence of medical errors, client satisfaction, success of the veterinary practice and revenue generation. Ensuring a coherent approach to the maintenance of animal health and wellbeing is of paramount importance, yet challenges such as interprofessional prejudice, misunderstanding of motivations and a lack of recognition, respect, empowerment or trust can prevent best practice. Effective interprofessional communication and collaboration is considered a key factor in the successful implementation of nutritional assessment and a positive team environment. Founded on respect, trust and mutual support, helps overcome challenges and provide the best outcome for both pets and their owners. This book provides evidence-based theory in an accessible and practical way to help veterinary healthcare teams implement interprofessional approaches to nutritional care and support.

Nutrition in Patient Care, An Issue of Physician Assistant Clinics, E-Book Corri Wolf, 2022-09-27 In this issue, guest editors bring their considerable expertise to this important topic. Provides in-depth reviews on the latest updates in the field, providing actionable insights for clinical practice. Presents the latest information on this timely, focused topic under the leadership of experienced editors in the field. Authors synthesize and distill the latest research and practice guidelines to create these timely, topic-based reviews.
