Vivisection In Historical Perspective:

Vivisection in Historical Perspective Nicolaas A. Rupke, 1987 This is the first book to examine the debate over vivisection over the past century in detail placing it in the context of the wider conflict over the value of modern scientific research book depository [The Routledge Companion to Animal-Human History](#) Hilda Kean, Philip Howell, 2018-09-03 The Routledge Companion to Animal Human History provides an up to date guide for the historian working within the growing field of animal human history Giving a sense of the diversity and interdisciplinary nature of the field cutting edge contributions explore the practices of and challenges posed by historical studies of animals and animal human relationships Divided into three parts the Companion takes both a theoretical and practical approach to a field that is emerging as a prominent area of study Animals and the Practice of History considers established practices of history such as political history public history and cultural memory and how animal human history can contribute to them Problems and Paradigms identifies key historiographical issues to the field with contributors considering the challenges posed by topics such as agency literature art and emotional attachment The final section Themes and Provocations looks at larger themes within the history of animal human relationships in more depth with contributions covering topics that include breeding war hunting and eating As it is increasingly recognised that nonhuman actors have contributed to the making of history The Routledge Companion to Animal Human History provides a timely and important contribution to the scholarship on animal human history and surrounding debates *Historical Perspectives on the Role of the MRC* Joan Austoker, Linda Bryder, 1989 This volume explores the role and accomplishments of the British Medical Research Council in the first half of the twentieth century It reviews work undertaken by this important research body as well as information on the organization s relationship with the Ministry of Health the Colonial Office the Royal College of Physicians and Surgeons and industry and pharmaceutical companies Internal influences such as the leadership of MRC secretaries are considered while external forces which helped shape Council policy area covered in depth The book will place the work of the MRC in a broad context examining its impact both nationally and internationally helping the reader to gain a complete understanding of this key institution **The making of British bioethics** Duncan Wilson, 2015-11-01 The making of British bioethics provides the first in depth study of how philosophers lawyers and other outsiders came to play a major role in discussing and helping to regulate issues that used to be left to doctors and scientists It details how British bioethics emerged thanks to a dynamic interplay between sociopolitical concerns and the aims of specific professional groups and individuals who helped create the demand for outside involvement and transformed themselves into influential ethics experts Highlighting this interplay helps us appreciate how issues such as embryo research and assisted dying became high profile bioethical concerns in the late twentieth century and why different groups now play a critical role in developing regulatory standards and leading public debates The book draws on a wide range of original sources and will be of interest to historians of medicine and science

The History of the University of Oxford: Volume VII: Nineteenth-Century Oxford, Part 2 M. G. Brock, M. C. Curthoys, 2000-11-16

Volume VII of *The History of the University of Oxford* completes the survey of nineteenth century Oxford begun in Volume VI After 1871 both teachers and students at Oxford were freed from tests of religious belief The volume describes the changed mental climate in which some dons sought a new basis for morality while many undergraduates found a compelling ideal in the ethic of public service both at home and in the empire As the existing colleges were revitalized and new ones founded the academic profession in Oxford developed a peculiarly local form centred upon college tutors who stood in somewhat uneasy relation with the University's professors The various disciplines which came to form the undergraduate curriculum in both the arts and sciences are subject to major reappraisal and Oxford's hidden curriculum is explored through accounts of student life and institutions including organized sport and the Oxford Union New light is shed on the social origins and previous schooling of undergraduates A fresh assessment is made of the movement to establish women's higher education in Oxford and the strategies adopted by its promoters to implant communities for women within the masculine culture of an ancient university Other widened horizons are traced in accounts of the University's engagement with imperial expansion social reform and the educational aspirations of the labour movement as well as the transformation of its press into a major international publisher The architectural developments considerable in quantity and highly varied in quality receive critical appraisal in a comprehensive survey of the whole period covered by Volumes VI and VII 1800-1914 By the early twentieth century the challenges of socialism and democracy together with the demand for national efficiency gave rise to a renewed campaign to address issues such as promoting research abolishing compulsory Greek and more generally broadening access to the University Under the terrible test of the First World War still more deep seated concerns were raised about the side effects of Oxford's educational practices and the volume concludes with some reflections on the directions which the University had taken over the previous fifty years

series blurb No private institutions have exerted so profound an influence on national life over the centuries as the universities of Oxford and Cambridge Few universities in the world have matched their intellectual distinction and none has evolved and maintained over so long a period a strictly comparable collegiate structure Now a completely new and full scale History of the University of Oxford from its obscure origins in the twelfth century until the late twentieth century has been produced by the university with the active support of its constituent colleges Drawing on extensive original research as well as on the centuries old tradition of the study of the rich source material the History is altogether comprehensive appearing in eight chronologically arranged volumes Together the volumes constitute a coherent overall study yet each has a unity of its own under individual editorship and brings together the work of leading scholars in the history of every university discipline and of its social institutional economic and political development as well as its impact on national and international life The result

is a history not only more authoritative than any previously produced for Oxford but more ambitious than any undertaken for any other European university and certain to endure for many generations to come

Gentleman's Magazine and Historical Review, 1890 *Women against cruelty* Diana Donald, 2019-10-23 This is the first book to explore women's leading role in animal protection in nineteenth century Britain drawing on rich archival sources Women founded bodies such as the Battersea Dogs Home the Royal Society for the Protection of Birds and various groups that opposed vivisection They energetically promoted better treatment of animals both through practical action and through their writings such as Anna Sewell's *Black Beauty* Yet their efforts were frequently belittled by opponents or decried as typifying female sentimentality and hysteria Only the development of feminism in the later Victorian period enabled women to show that spontaneous fellow feeling with animals was a civilising force Women's own experience of oppressive patriarchy bonded them with animals who equally suffered from the dominance of masculine values in society and from an assumption that all powerful humans were entitled to exploit animals at will

Animal History Andrew Linzey, Clair Linzey, 2025-06-12 Traditional history overlooks non human animals But this book reinstates them as proper subjects of historical enquiry Fourteen essays from the *Journal of Animal Ethics* by accomplished academics offer pioneering insights into what animal history is and how it should be done The book is divided into sections covering the nature of animal history selected intellectual figures and historical controversies concerning meat eating and vivisection

Animal Theologians Andrew Linzey, Clair Linzey, 2023 Many people who have thought about God have not thought about animals or about the relationship between the two But among those who have some of the most celebrated religious thinkers This volume comprises 24 scholarly studies that detail challenges to the dominant anthropocentrism of most religious traditions

Stearns, 2001 The *Encyclopedia of European Social History* covers all aspects of European social history from the Renaissance to the present This six volume reference includes more than 230 articles ranging from 5 000 to 10 000 words on everything from serfdom and the economy to witchcraft and public health Some of the thematically arranged articles include Honor and Shame Prostitution Schools and Schooling The World Economy and Colonial Expansion Clothing and Fashion Spinsters and Bachelors Travel and Tourism The World Wars and the Depression Birth Contraception and Abortion The European Marriage Pattern Communications the Media and Propaganda Ethnicity and National Identity Church and Society Fairs and Markets The Deaf the Blind and the Retarded Rural Revolts The Aristocracy and Gentry The Welfare State This reference provides a survey of hundreds of topics Included are more than 700 photographs drawings and maps The sixth volume also includes biographies of prominent European figures and a comprehensive index **The American Historical Review** John Franklin Jameson, Henry Eldridge

Bourne, Robert Livingston Schuyler, 1928 *American Historical Review* is the oldest scholarly journal of history in the United States and the largest in the world. Published by the American Historical Association, it covers all areas of historical research.

The Catholic Historical Review, 1926 **Historical Aspects of Unconventional Medicine** Robert Jütte, Motzi Eklöf, Marie C. Nelson, 2001 *The Representation of Bodily Pain in Late Nineteenth-century English Culture* Lucy Bending, 2000. This book presents a study of the ways in which concepts of pain were treated across a broad range of late Victorian writing, placing literary texts alongside sermons, medical textbooks, and the campaigning leaflets in order to suggest patterns of presentation and evasion to be perceived throughout the different texts assembled. Pain is not a shared cross-cultural phenomenon, and this book uses the examples of fire walking, flogging, and tattooing to show that despite the fact that pain is often invoked as a marker of shared human identity, understandings of pain are sharply affected by class, gender, race, and supposed degree of criminality. In arguing this case, Virginia Woolf's claim that there is no language for pain is taken seriously, but the importance of this book lies in its exploration of the ways in which the seemingly incommunicable experience of bodily suffering can be conveyed.
