cinema recapitulates the histories of biological evolution and modern technology inside our consciousness Through the projection of recorded traces of the world onto a brain like screen the cinema can open viewers up to self interrogation and empathy towards Otherness Bazin was neither a spiritualist nor an animist or a pantheist yet his film theory leads also to ideas of a more cosmological persuasion through editing and camera movement cinema explores our belonging to a vast universe that extends from the microbes of the microscope to the stars of the telescope Such ideas of connectedness coupled with Bazin s well known emphasis of realism form the foundation for his film theory s embrace of Italian neorealism Choosing to avoid a quantitative naturalism based on accumulation of details Bazin s theory instead promotes the kind of cinema that celebrates perceptual displacement the objectification of human behavior and one s own critical self awareness National Union Catalog ,1972 Includes entries for maps and atlases **General Catalogue of Printed Books** British Museum.
