## Yaqui Syntax:

**Relative Clauses in Languages of the Americas** Bernard Comrie, Zarina Estrada Fernández, 2012 Patterns of relative clause formation tend to vary according to the typological properties of a language Highly polysynthetic languages tend to have fully nominalized relative clauses and no relative pronouns while other typologically diverse languages tend to have relative clauses which are similar to main or independent clauses Languages of the Americas with their rich genetic diversity have all been under the influence of European languages whether Spanish English or Portuguese a situation that may be expected to have influenced their grammatical patterns The present volume focuses on two tasks The first deals with the discussion of functional principles related to relative clause formation diachrony and paths of grammaticalization simplicity vs complexity and formalization of rules to capture semantic syntactic correlations The second provides a typological overview of relative clauses in nine different languages going from north to south in the Americas *Sonora Yaqui Language Structures* John M. Dedrick, Eugene H. Casad, 2019-05-28 John Dedrick who lived and worked among the Yaquis for more than thirty years shares his extensive knowledge of the language while Uto Aztecan specialist Eugene Casad helps put the material in a comparative perspective Jacket [Applicative Morphology](#) Sara Pacchiarotti, Fernando Zuniga, 2022-10-03 This book is about recurrent functions of applicative morphology not included in typologically oriented definitions Based on substantial cross linguistic evidence it challenges received wisdom on applicatives in several ways First in many of the surveyed languages applicatives are the sole means to introduce a non Actor semantic role into a clause When there is an alternative way of expression the applicative counterpart often has no valence increasing effect on the targeted root Second applicative morphology can introduce constituents which are not syntactic objects and or co occur with obliques Third functions such as conveying aspectual nuances to the predicate intensity repetition habituality or its arguments partitive P highly individuated P narrow focusing constituents and functioning as category changing devices are attested in geographically distant and genetically unrelated languages Further this volume reveals that spatial related morphology is prone to developing applicative functions in disparate languages and phyla Finally several contributions discuss the diachrony of applicative constructions and their non syntactic attested functions including a case of applicatives in the making **Diverse Scenarios of Syntactic Complexity** Albert Álvarez González, Zarina Estrada-Fernández, Claudine Chamoreau, 2019-07-15 This volume surveys the phenomenon of syntactic complexity in a diversity of languages and from a diversity of theoretical perspectives The topics include clause combining strategies such as relative complement and adverbial clauses serialization clausal nominalizations but also the switch reference systems involved in clause chains the role of insubordination and the influence of language contact in the development of syntactic complexity as well as the acquisition of complex clauses in child language and the grammaticalization processes leading to syntactic complexity These studies illustrate the varied aspects involved in clause combining and help to understand how syntactic complexity works and

evolves in the world's languages how it varies across languages how it is influenced by language contact how it is acquired  
 As such this book gives the opportunity for readers to expand both their typological and their theoretical knowledge about  
 syntactic complexity in a variety of languages     The Syntax-semantic Interface in Yaqui Complex Sentences Lilian Graciela  
 Guerrero Valenzuela,2005     *Syntax* Talmy Givón,1984 The long awaited second volume of the two volume work on syntax  
 from a functional typological perspective Grammar is viewed as a non arbitrary language processing device to be understood  
 in terms of the various substantive parameters relevant to language Communicative function cognitive processing socio  
 culture and neuro biology Distortions in this complex yet highly iconic code are due to conflicting functional requirements  
 most commonly introduced into the code through the course of diachronic change Cross linguistic variation within each  
 functional domain is highly constrained and yields a coherent typology of the most natural ways the same communicative  
 function can be performed The volume covers the syntax of complex clauses and is organized according to the following plan  
 Chapter 12 Noun phrases Chapter 13 Verbal complements Chapter 14 Voice and de transitivization Chapter 15 Relative  
 clauses Chapter 16 Contrastive focus constructions Chapter 17 Marked topic constructions Chapter 18 Non declarative

 processing instructions Chapter 21 Markedness and iconicity in syntax     **Yaqui Coordination** Constantino Martínez
