Iowa. Supreme Court

Time For Decision:

The Time for Decision Sumner Welles, 1964 Supporting Real Time Decision-Making Frada Burstein, Patrick Brézillon, Arkady Zaslavsky, 2010-11-12 This volume of *Annals of Information Systems* will acknowledge the twentieth anniversary of the founding of the International Society for Decision Support Systems ISDSS by documenting some of the current best practices in teaching and research and envisioning the next twenty years in the decision support systems field. The volume is intended to complement existing DSS literature by offering an outlet for thoughts and research particularly suited to the theme of describing the next twenty years in the area of decision support. Several subthemes are planned for the volume. One subtheme draws on the assessments of internationally known DSS researchers to evaluate where the field has been and what has been accomplished. A second subtheme of the volume will be describing the current best practices of DSS research and teaching efforts. A third subtheme will be an assessment by top DSS scholars on where the DSS discipline needs to focus in the future. The tone of this volume is one of enthusiasm for the potential contributions to come in the area of DSS contributions that must incorporate an understanding of what has been accomplished in the past, build on the best practices of today, and be integrated into future decision making practices.

Simulation modeling and fuzzy logic in real-time decision-making of airport services Наталья Емельянова, М. Дли, А. Емельянов, О. Бульгина, 2017-06-22 Decision making by the aircrafts services of the international airport which provides for intensive traffic of aircraft and their ground handling becomes a very topical issue. If earlier it was believed that the intensity is provided only by the number of runways, nowadays a large accumulation of aircraft on the airport platform field creates equally complex difficulties in comparison with aircraft take offs and landings. Solving such problems with the use of crisp methods of queuing theory gives little. This article deals with modern fuzzy methods based on simulation modeling and fuzzy logic.
