## **Waldseemüller World Map 1507:**

Waldseemüller World Map (1507). Kieran O'Mahony, O.S.A., Martin Waldseemüller, 2003 Primary Source Material Ideal for teachers and cartographers Historians Geographers and Librarians A must for the map enthusiast and the history buff High gloss finish makes map accessible Translation of Latin originals to help explain exploration era The Martin Waldseemüller World Map of 1507 Don Heinrich Tolzmann, 2003 **Henricus Martellus's World Map at Yale (c. 1491)** Chet Van Duzer, 2018-08-03 This book presents groundbreaking new research on a fifteenth century world map by Henricus Martellus c 1491 now at Yale The importance of the map had long been suspected but it was essentially unstudiable because the texts on it had faded to illegibility Multispectral imaging of the map performed with NEH support in 2014 rendered its texts legible for the first time leading to renewed study of the map by the author This volume provides transcriptions translations and commentary on the Latin texts on the map particularly their sources as well as the place names in several regions This leads to a demonstration of a very close relationship between the Martellus map and Martin Waldseemüller's famous map of 1507 One of the most exciting discoveries on the map is in the hinterlands of southern Africa The information there comes from African sources the map is thus a unique and supremely important document regarding African cartography in the fifteenth century This book is essential reading for digital humanitarians and historians of cartography

The Naming of America Martin Waldseemüller, 2008 Tells the story of Martin Waldseemüller's 1507 World Map the first map ever to display the name America **The Martin Waldseemüller World Maps of 1507 and 1516**, 2001\*

**Martin Waldseemüller's 'Carta marina' of 1516** Chet Van Duzer, 2019-10-09 This open access book presents the first detailed study of one of the most important masterpieces of Renaissance cartography Martin Waldseemüller's Carta marina of 1516 By transcribing translating into English and detailing the sources of all of the descriptive texts on the map as well as the sources of many of the images the book makes the map available to scholars in a wholly unprecedented way In addition the book provides revealing insights into how Waldseemüller went about making the map information that can't be found in any other source The Carta marina is the result of Waldseemüller's radical re-evaluation of what a world map should be he essentially started from scratch when he created it rejecting the Ptolemaic model and other sources he had used in creating his 1507 map and added more descriptive texts and a wealth of illustrations Given its content the book offers an essential reference work not only on this map but also for anyone working in sixteenth century European cartography **The Martin Waldseemüller 1507 World Map**, 2002\* The Early Modern Global South in Print Sandra Young, 2016-03-23 Early modern geographers and compilers of travel narratives drew on a lexicon derived from cartography's seemingly unchanging coordinates to explain human diversity Sandra Young's inquiry into the partisan knowledge practices of early modernity brings to light the emergence of the early modern global south Young proposes a new set of terms with which to understand the racialized imaginary inscribed in the scholarly texts that presented the peoples of the south as objects of an inquiring

gaze from the north Through maps images and even textual formatting equivalences were established between new worlds many of them long known to European explorers she argues in terms that made explicit the divide between north and south This book takes seriously the role of form in shaping meaning and its ideological consequences Young examines in turn the representational methodologies or artes deployed in mapping the whole world illustrating creating charts for navigation noting down observations collecting and cataloguing curiosities reporting events formatting materials and editing and translating old sources By tracking these methodologies in the lines of beauty and evidence on the page we can see how early modern producers of knowledge were able to attribute alterity to the southern climes of an increasingly complex world while securing their own place within it
