## **Walking Artist:**

**Walking as Artistic Practice** Ellen Mueller, 2023-10-01 *Walking as Artistic Practice* lays out foundational information about the history of walking and its development as an artistic practice making it accessible to readers of all backgrounds. It also provides guidance on how to analyze and discuss walking artworks with vocabulary support over three hundred examples and over seventy five exercises. The chapters offer a variety of topical approaches allowing readers and instructors to craft an experience most suited to their interests and needs. Themes include observational and sensory experience leading versus following who walks where identity and positionality rituals place activism connections to drawing and embodiment. Appendices include information on documentation sample syllabi readings and resources brainstorming tips community engagement guidance and tips for travel based study. Instructors will appreciate this text because it has so many resources to direct students to when they have questions about analysis history community engagement or documentation approaches. It is the type of book that students will hang onto long after the course is done because it is so practical and useful. *Walking and the Aesthetics of Modernity* Klaus Benesch, François Specq, 2016-08-31 This book gathers together an array of international scholars critics and artists concerned with the issue of walking as a theme in modern literature philosophy and the arts. Covering a wide array of authors and media from eighteenth century fiction writers and travelers to contemporary film digital art and artists books the essays collected here take a broad literary and cultural approach to the art of walking which has received considerable interest due to the burgeoning field of mobility studies. Contributors demonstrate how walking far from constituting a simplistic naïve or transparent cultural script allows for complex visions and reinterpretations of a human's relation to modernity introducing us to a world of many different and changing realities. *Walking as Embodied Research* Christian Ernten, Nick Shepherd, 2024-09-30 In recent years walking has emerged as a methodological tool and as a conceptually exciting point of departure across a range of disciplines and practices. This volume explores walking as a form of embodied research practice that offers fresh perspectives on key contemporary debates and areas of interest. These include the climate emergency and the debate around the Anthropocene decolonial thinking and the struggle for social justice feminist and queer walking methodologies and the notion of the infraordinary and practices of everyday life. Contributions to this volume are by scholars artists and practitioners drawn from a wide range of disciplines and fields and from across the Global South and North. An overarching theme of the volume is the manner in which the act of walking brings the body into presence as a material part of the research process and the forms of attentiveness that this encourages. Another theme is the intimate connection between the act of walking and the act of writing. As familiar landscapes change under the weight of Anthropogenic environmental change walking becomes an act of witnessing and a spur to action. Rather than being a singular activity walking itself is understood as a socially economically and politically constructed and contested act. This volume will serve as a source of inspiration to readers from across the arts humanities and social sciences who are interested

in walking methodologies and in new and sustainable research practices

**Walking Through Social Research** Charlotte Bates, Alex Rhys-Taylor, 2017-04-11 As an ethnographic method walking has a long history but it has only recently begun to attract focused attention. By walking alongside participants researchers have been able to observe experience and make sense of a broad range of everyday practices. At the same time the idea of talking and walking with participants has enabled research to be informed by the landscapes in which it takes place. By sharing conversations in place and at the participants' pace sociologists are beginning to develop both a feel for and a theoretical understanding of the transient embodied and multisensual aspects of walking. The result as this collection demonstrates is an understanding of the social world evermore congruent with people's lived experiences of it. This interdisciplinary collection comprises a unique journey through a variety of walking methodologies. The collection highlights a range of possibilities for enfolding sound, smell, emotion, movement and memory into our accounts, illustrating the sensuousness, skill, pitfalls and rewards of walking as a research practice. Each chapter draws on original empirical research to present ways of walking and to discuss the conceptual, practical and technical issues that walking entails. Alongside feet on the ground the devices and technologies that make up hybrid research mobilities are brought to attention. The collection is bookended by two short pedestrian essays that take the reader on illustrative urban walks, suggesting routes through the city as well as ways in which the reader might make their own path through walking methods. An innovative title *Walking Through Social Research* will be of interest to undergraduate and postgraduate students, researchers and academics who are interested in Sociology, Geography, Cultural Studies, Urban Studies and Qualitative Research Methods.

*The Routledge Companion to Site-Specific Performance* Victoria Hunter, Cathy Turner, 2024-12-17 This collection comprises a comprehensive overview of key themes, arguments and practices central to the study and understanding of site-specific performance. Its collected essays, case studies and practitioner accounts represent a must-have resource that engages with established and emergent ideas, themes and practices central to this performance sub-discipline. Acknowledging the interdisciplinary nature of this field, emergent through the creation and presentation of performance in non-theatre spaces, the companion includes writing from scholars whose work intersects with ideas from a range of related fields including dance, theatre, dramaturgy, human geography, architecture, walking studies and archaeology. Alongside theoretical discussions and case study examples, a section on methods and structures allows site-specific practitioners to illustrate a range of practical approaches, tasks and modes of producing site-specific performance in a range of sites. This interdisciplinary survey brings together practices and voices from a wide range of global contexts, demonstrating and challenging the breadth of site-specific discourse. It provides a rich palette of perspectives, approaches and ideas for students, academics and researchers to draw from.

*Anglo-American Exchange in Postwar Sculpture, 1945-1975* Rebecca Peabody, 2011-12-31 *Anglo-American Exchange in Postwar Sculpture 1945-1975* redresses an important art historical oversight. Histories of American and British sculpture are usually told separately with artists and their work divided by
