The Future of Creation Order Gerrit Glas, Jeroen de Ridder, 2018-01-12 This work provides an overview of attempts to assess the current condition of the concept of creation order within reformational philosophy compared to other perspectives Focusing on the natural and life sciences and theology this first volume of two examines the arguments for and against the beauty coherence and order shown in the natural world being related to the will or nature of a Creator It examines the decay of a Deist universe and the idea of the pre-giveness of norms laws and structures as challenged by evolutionary theory and social philosophy It describes the different responses to the collapse of order that given by Christian philosophy scholars who still argue for the idea of a pre-given world order and that of other scholars who see this idea of stable creation order and or natural law as redundant and in need of a thorough rethinking It studies the particular role that reformational philosophy has played in the discussion It shows how ever since its inception almost a century ago the concepts of order and law principle structure have been at the heart of this philosophy and that one way to characterise this tradition is as a philosophy of creation order Reformational philosophers have maintained the notion of law as holding for reality This book discusses the questions that have arisen about the nature of such law is it a religious or philosophical concept does law just mean orderliness How does it relate to laws of nature Have they always existed or do they emerge during the process of evolution

Science Fiction - The Evolutionary Mythology of the Future Thomas Lombardo, 2018-12-14 An evolutionary and transformative journey through the history of science fiction from the innermost passions and dreams of the human spirit to the farthest reaches of the universe human imagination and beyond
