Wto And Developing Countries:

Developing Countries' Participation in the World Trade Organization Constantine Michalopoulos, 2016 Many developing countries are not participating in the World Trade Organization as much as they should What can be done about it In the 1960s and 1970s developing countries viewed UNCTAD rather than the GATT as the main institution through which to promote their interests in international trade But beginning with the Uruguay Round in the mid 1980s their attitude changed many more of them became members of the GATT and a significant number played an active role in negotiations Michalopoulos analyzes developing countries representation and participation in the World Trade Organization WTO as of mid 1997 to determine how developing countries can effectively promote their interests and discharge their responsibilities under the rules and agreements of the new organization He concludes that although many developing countries are actively participating in the new process more than half of the developing countries that are members of the WTO participate little more than they did in the early 1980s and have not increased their staffing despite the vastly greater complexity of issues and obligations Institutional weaknesses at home are the main constraints to effective participation and representation of their interests at the WTO To make their participation more effective Michalopoulos recommends that the developing countries establish adequately staffed WTO missions based in Geneva failing that pooling their resources and representation in Geneva and being sure to pay their dues which are typically small He recommends that the international community place higher priority on programs of assistance in support of institutional development of poorer countries aimed at enhancing their capacity to participate in the international trading system and the WTO and that the WTO review its internal rules and procedures to ensure that inadvertently they do not make developing countries participation more difficult This paper is part of a larger effort by the World Bank to collaborate with the World Trade Organization in developing approaches for the more effective integration of the developing countries in the international trading system

Emerging Powers in the WTO C. Michalopoulos, 2013-11-29 This volume examines the main factors for developing country trade performance in the last thirty years their own trade policies market access issues they face and their increasingly more effective participation in the WTO and the Doha Round of multilateral trade negotiations

Hoekman, Aaditya Mattoo, Philip English, 2002 Publisher's description Developing countries are increasingly confronted with the need to address trade policy related issues in international agreements most prominently the World Trade Organization WTO New WTO negotiations on a broad range of subjects were launched in November 2001 Determining whether and how international trade agreements can support economic development is a major challenge Stakeholders in developing countries must be informed on the issues and

understand how their interests can be pursued through international cooperation This handbook offers guidance on the design of trade policy reform surveys key disciplines and the functioning of the World Trade Organization WTO and discusses numerous issues and options that confront developing countries in using international cooperation to improve domestic policy and obtain access to export markets Many of the issues discussed are also relevant in the context of regional integration agreements Separate sections of the handbook summarize what constitutes sound trade policy the major aspects of the WTO from a development perspective policy issues in the area of merchandise trade and the liberalization of international transactions in services protection of intellectual property rights and economic development new regulatory subjects that are emerging in the agenda of trade talks and enhancing participation of developing countries in the global trading system

Developing Countries in the WTO Legal System Chantal Thomas,Joel P Trachtman,2009-04-15

With contributions from some of the leading experts in international trade law and economics Joel P Trachtman and Chantal Thomas have compiled a comprehensive volume that looks at the positioning of developing countries within the WTO system These chapters address some of the most pressing issues facing these countries while reflecting on Robert E Hudec s groundbreaking book *Developing Countries in the GATT Legal System* In his landmark contribution Hudec argued against preferential and non reciprocal treatment for developing countries He did so on the basis of a combination of economic political and legal insights that persuasively demonstrated that non reciprocal treatment would not benefit developing countries It is a testament to Hudec s legacy that his analysis is still the object of scholarly discussion more than 20 years later The first part of this book evaluates the general situation of developing countries within the WTO The second part examines market access and competition law within these countries Lastly it discusses the special arrangements these countries have with international financial institutions the developing country s capacity to litigate and an analysis of the country s level of participation in WTO dispute settlements

World Trade Organisation (WTO) and Developing Countries Surendra Bhandari,1998

Developing Countries in the WTO C. Michalopoulos,2001-10-25

Globalization means that today more than ever before growth in developing countries and the reduction of poverty depend on world trade and a well functioning trading system This volume reviews developing countries trade policies and institutions and the challenges they face in the World Trade Organization where the rules that govern the international trading system are set

The Development Dimension James Bacchus,2020

Rethinking developing country status at the World Trade Organization WTO is essential for the modernization and survival of the institution The Trump administration has recognized this challenge and is seeking changes to the flexibilities provided to developing countries Referred to as special and differential treatment SDT there are 183 provisions in the WTO agreements that give developing countries special rights These include longer time periods to implement obligations preferential tariff schemes and technical support from developed countries SDT was

envisioned as a means to help the poorest WTO Members meet their obligations to the fullest extent possible. But today when rapidly growing markets with significant global reach lay claim to these special rights, does it serve this purpose? The Trump administration thinks it does not. A recent reform proposal from the United States claims that SDT reflects an outdated dichotomy between developed and developing countries and that the ability of countries to self-declare their developing country status amplifies this problem. Without a clear definition of what special rights SDT provides, the United States proposal argues it is difficult to ascertain objectively who should receive those benefits and for how long. A number of other developed countries have come out in support of reform, and their discussions highlight the need to establish a path forward. For their part, most developing countries continue to defend the current approach to SDT. This paper argues that the basic flaw in the WTO's current approach to SDT is that it is founded on seeking exemptions from WTO obligations instead of the means to enable developing countries to meet these obligations and thus integrate them fully into the multilateral trading system. The United States is correct in pointing out the inherent unfairness in the application of SDT, which does not differentiate between levels of development among developing countries. As a result, the poorest countries are made worse off while those that are economically better off receive a free ride from the rest of the multilateral trading system. By adopting a new evidence-based case-by-case approach to SDT, the concerns of the poorest countries can be better addressed while at the same time ensuring that advanced developing countries carry their weight in the organization.

Guide to the WTO and Developing Countries Peter Gallagher, 2000-09-25. Developing countries comprise a two-thirds majority of the membership of the World Trade Organization, with nearly thirty of these classed by the UN as being among the 48 least developed countries in the world. In order to ensure the equitable participation of these countries in the benefits of the global trading system, the GATT Uruguay Round Agreements that created the WTO accorded special and differential treatment to developing countries. This Guide covers these provisions of the WTO Agreements with detailed information on how developing countries can benefit from special rules governing such areas as access to developed country markets in all major commodities and services, the dispute settlement process, trade policy review, foreign direct investment, environmental and labour standards, and technical assistance. The Guide also offers the reader case studies on how some developing country members of the WTO—Uganda, India, and Côte d'Ivoire—are making progress in working with the obligations and the benefits provided to them by the WTO Agreements.

WTO negotiations on agriculture and developing countries Hoda, Anwarul, Gulati, Ashok, 2008-04-03. The World Trade Organization's Doha Round of trade talks has been plagued by a lack of concrete progress toward establishing a fair and harmonious agricultural trading system. Because the results of the Doha Round could have far-reaching implications for the trade and economic prospects of developing countries in the twenty-first century, it is critical for these countries to fully understand the issues involved in the negotiations on agriculture. However, there has been no authoritative analysis of the rules and modalities on which governments of developing countries can rely. This book

coauthored by an insider to the trade talks that led to the establishment of the WTO fills this gap The volume begins with a detailed analysis of the provisions of the WTO s Agreement on Agriculture and the modalities of the negotiations It examines the implementation experience of key members of the WTO then traces the developments in the negotiations up to the recent impasse In light of these considerations and on the basis of a case study of India the authors propose various elements of a negotiating position and strategy for developing countries The authors offer tough but realistic recommendations regarding tariffs market access treatment of sensitive or special products and other aspects of international trade This book will be of particular interest to researchers and practitioners as well as students seeking in depth knowledge of the recent history of agricultural trade talks
