

# CHECKLIST FOR SOLAR PV

## SYSTEM SIZE

Size the PV system based on your annual consumption not the size of your roof or your peak monthly load. Sizing the system based on your peak load in the summer means you may generate excess power during the other months. Utilities buy excess electricity at lower rates. Excess power lowers your ROI.

## INCENTIVES

The 30% investment tax credit (ITC) is available nationwide. Check your local area for additional rebate programs. If you calculate the 30% ITC on your overall system costs, you may owe income tax on the local rebate. To be safe, subtract the local rebate from the total cost, then apply the 30% tax credit.

## GOALS

Determine your goals. Are you focused on the environmental benefits, the return on investment or do you want to be an early adopter. Ask your solar "architect" to design the system around your goals.

## COST

How much should solar cost? Competition drives down costs. In my home market, which is in San Antonio Texas, the average cost in 2015 was \$3.50 per watt for a residential system. If your quote is higher, shop around.

## INSTALLATION COMPANY

This one is tough? Do you know anyone with solar? Probably not. Does your utility company have a list of "certified installers"? Your best bet is to find an advocate, nonprofit or solar "architect" to help. If you live in Texas, send me an email - I know several qualified firms.

## AFTER THE INSTALLATION

How do you know the installation company installed the equipment you paid for? Do you have a performance guarantee? What about a maintenance plan?

## **Checklist Solar Panels:**

Solar Power Generation Problems, Solutions, and Monitoring Peter Gevorkian, 2016-03-07 Solar Power Generation Problems Solutions and Monitoring is a valuable resource for researchers professionals and graduate students interested in solar power system design Written to serve as a pragmatic resource for solar photovoltaic power systems financing it outlines real life straightforward design methodology Using numerous examples illustrations and an easy to follow design methodology Peter Gevorkian discusses some of the most significant issues that concern solar power generation including power output energy monitoring and energy output enhancement fault detection fire and life safety hazard mitigation and detailed hardware firmware and software analytic solutions required to resolve solar power technology shortcomings This essential reference also highlights the significant issues associated with large scale solar photovoltaic and solar power generation technology covering design construction deployment and fault detection monitoring as well as life safety hazards

Energy Conservation Guidebook, Third Edition Dale R. Patrick, Stephen W. Fardo, Ray E. Richardson, Brian W. Fardo, 2020-12-17 Revised and edited this new third edition reference covers the full scope of energy management techniques and applications for new and existing buildings with emphasis on the systems approach to developing an effective overall energy management strategy Foremost in the enhancements to the new edition is content that reflects the emphasis on conservation for green energy awareness Also examined are building structural considerations such as heat loss and gain windows and insulation A thorough discussion of heating and cooling systems basics is provided along with energy management guidelines Also covered are energy conservation measures that may be applied for lighting systems water systems and electrical systems Specific energy management technologies and their application are discussed in detail including solar energy systems energy management systems and alternative energy technologies Covers the full scope of energy management techniques and applications for new and existing buildings Emphasizes a systems approach to developing an effective overall energy management strategy Includes enhanced content that reflects the emphasis on conservation for green energy awareness

**Solar Energy** Andy Walker, 2013-08-07 Solar Energy is an authoritative reference on the design of solar energy systems in building projects with applications operating principles and simple tools for the construction engineering and design professional The book simplifies the solar design and engineering process providing sample documentation and special tools that provide all the information needed for the complete design of a solar energy system for buildings to enable mainstream MEP and design firms and not just solar energy specialists to meet the growing demand for solar energy systems in building projects

*The Energy and Environment Checklist* Betty Warren, 1980  
Energy Conservation Guidebook Dale R. Patrick, Stephen W. Fardo, Ray E. Richardson, Brian W. Fardo, Mark Barron, 2023-12-14 Efficient energy management and effective conservation procedures have been very important considerations for our society for many years An oil embargo in the 1970s and early 1980s brought about a new awareness of

energy conservation Because of various factors like loss of tax credits and efficiency standards imposed by the government public interest dropped considerably in regard to energy conservation A revival in energy conservation among the general public occurred following the Persian Gulf War in the early 1990s What does the 21st century hold Conflicts in the Middle East high prices for petroleum and increasing population worldwide will all be significant influences on energy and its conservation Considerable discussion of climate change global warming and increased concerns in regard to our electricity supply have provided motivation for building energy demand to be more flexible Energy Management and Conservation Fourth Edition provides a very practical discussion of how energy can be managed and saved in most types of buildings This edition not only updates the previous edition but adds updated content concerning energy cost reduction going green to improve the environment The authors of this book have written several books that use the systems approach Through the use of the systems approach the reader will be able to grasp how different parts of a building fit together to form a unit that uses energy efficiently This text provides a thorough and practical discussion of the operation of systems that are found in most types of buildings Each system is discussed with energy management and conservation in mind going green to save money and improve the environment There are many ways to manage a building to accomplish efficient energy conservation Several of the chapters have checklists at the end to summarize ways of conserving energy that relate to the chapter Important changes in this edition include coverage of governmental requirements from agencies such as Environmental Protection Agency EPA United States Department of Energy USDOE and American Society of Refrigerating Heating and Air Conditioning Engineering ASHRAE updated as of 2022 standards Instrumentation updates include types of sensors and the concept of smart devices such as meters Addition of computer building maintenance management systems and new updates for renewable energy resources are included Enhancements to existing systems content such as variable frequency drives for pumps have been carefully added

*Energy Resources and Conservation Related to Built Environment* Oktay Ural, 2013-10-02 Energy Resources and Conservation Related to Built Environment is a collection of papers that discusses energy resources energy conservation schemes better structure design or construction and alternative energy resources Some papers discuss energy conscious design methodologies for townhouses use of composite components in structural framing and also energy and physical planning of houses One paper explains the process and techniques of the water energy manual developed as part of the Water Energy Conservation Project sponsored by the U S Department of Energy Building site selection window design energy auditing boiler efficiency and power factor correcting capacitors help in preserving energy at the same time these also provide thermal comfort Alternative energy sources include small scale tidal energy generation airtight woodstoves wind energy methane recovery and hybrid energy systems Other papers discuss case studies in energy and design such as the utilization of the Hittman methodology in Boulder Colorado the student performed energy audits done in Minneapolis and Minnesota and the energy performance of New Zealand s built environment The collection is

beneficial to environmentalists civil or structural engineers architects as well as researchers whose works are related with energy conservation and production      *Checklists* Alvin L.
