Ideas Async Communication:

Developing an Online Curriculum Lynnette R. Porter, 2004-01-01 *Developing an Online Educational Curriculum Techniques and Technologies* acts as a guidebook for teachers and administrators as they look for support with their online education programs. It offers teaching suggestions for everything from course development to time management and community building. The book is designed to provide information to help teachers work more effectively with online tools, develop course materials for existing online courses, work with the internet as a medium of education, and complete daily activities such as evaluating assignments, lecturing, and communicating with students more easily. Administrators are also given support in their efforts to recruit, train, and retain online teachers, allocate resources for online education, and evaluate online materials for promotion and tenure.

Business and Professional Communication Curtis Newbold, Jessie Lynn Richards, 2024-11-06 *Business and Professional Communication: A Human-Centered Approach* prepares students to succeed in today's workplace, defined by changing technology, a diversifying workforce, and an increase in remote and hybrid work. Authors Curtis Newbold and Jessie Lynn Richards guide students through the principles, practices, and techniques, helping them see that business communication is more than just a series of documents, meetings, and presentations; it's a human-centered process that requires a holistic understanding of communication across modes and contexts. With accessibility and inclusion leading the way, this text encourages students to be more conscientious, purposeful, and ethical in the way they communicate at work and beyond.

The World Is Your Office Prithwiraj Choudhury, 2025-04-22 A research-based deep dive into a growing phenomenon: companies allowing employees to work from anywhere and how those who adopt this model can boost talent, innovation, and productivity. As the debate around remote versus in-office work rages on, leaders in a wide range of industries continue to implement radically flexible work practices, allowing most, if not all, of their employees to work from anywhere. Why? They understand that geographic flexibility offers a competitive advantage: the ability to attract and retain top talent globally. In *The World Is Your Office*, Harvard Business School professor Prithwiraj Choudhury, who has been studying this phenomenon for over a decade, takes readers inside the trailblazing companies that are going all in on work from anywhere (WFA) policies. From startups and nonprofits to government agencies and large corporations, Choudhury's research shows why and how these organizations and their employees are benefiting. Drawing insights from this pioneering research, Choudhury also provides an extensive playbook for implementing successful WFA policies, offering leaders concrete strategies to use WFA as a means of hiring and retaining the best talent, effectively manage WFA teams, share knowledge, and combat isolation; leverage AI and automation to extend WFA into manufacturing and other deskless roles; design programs that attract talent to different regions. Filled with actionable insights and extensive case studies, *The World Is Your Office* empowers leaders to embrace the future of work.

Human-Computer Interaction and Management Information Systems: Applications. Advances in Management Information Systems Dennis F. Galletta, Yahong Zhang, 2014-12-18 *Human-Computer*

Interaction and Management Information Systems Applications offers state of the art research by a distinguished set of authors who span the MIS and HCI fields The original chapters provide authoritative commentaries and in depth descriptions of research programs that will guide 21st century scholars graduate students and industry professionals Human Computer Interaction or Human Factors in MIS is concerned with the ways humans interact with information technologies and tasks especially in business managerial organizational and cultural contexts It is distinctive in many ways when compared with HCI studies in other disciplines The MIS perspective affords special importance to managerial and organizational contexts by focusing on analysis of tasks and outcomes at a level that considers organizational effectiveness With the recent advancement of technologies and development of many sophisticated applications human centeredness in MIS has become more critical than ever before This work focuses on applications and evaluations including special case studies specific contexts or tasks HCI methodological concerns and the use and adoption process *Organizational Information Systems in the Context of Globalization* Mikko Korpela,Ramiro Montealegre,Angeliki Poulymenakou,2013-03-09 *Organizational Information Systems in the Context of Globalization* exemplifies the role of social theory in approaching ICT utilization challenges in a globalization context The debates raised on implementation policy organizations and organizing and social dynamics increase our awareness of the diversity of perspectives we need to delve into when framing the role of ICTs in the globalization agenda The equal representation of managerial and non managerial decision making contexts alerts us to the fact that ICTs should not be considered only as a corporate wealth creation prerogative This book contains the selected proceedings of the Working Conference on Information Systems Perspectives and Challenges in the Context of Globalization sponsored by the International Federation for Information Processing IFIP and held in Athens Greece in June 2003
