software support This dissertation is aimed at academic and IT professionals and SCM decision makers or consultants as it

provides insights into SCM software and the leading concepts behind it A qualitative approach was chosen for answering the

research questions which focus on general SCM software principles but also enquire benefits functionalities and the software

architecture of SAP s SCM 4 1 solution In addition to that the differences between what decision makers request and what

mySAP SCM 4 1 offers are addressed with the research questions To answer these research questions the structure of the

dissertation contains a general introduction to SCM software and includes a SCM software market overview After this part

one major part of the dissertation contains an analysis of the dominant SCM software solution mySAP SCM Release 4 1 The

examination of mySAP SCM 4 1 focuses first on technological aspects software architecture technological platform and

programming language before the business benefits and functionalities of this SCM software are examined After that the

functionalities business benefits and the architecture of mySAP SCM 4 1 are compared with the SCM software requirements

obtained from ten SCM professionals from different industries automotive logistics retail consumer packaged goods

consulting and education The analysis of the requirements from SCM decision makers gathered using a questionnaire shows

that an increase in SCM transparency and a reduction of SCM costs were the main requirements articulated by decision
